Feeder range 144-147
Feeder rods 60-69
Feeders 144-145
Fishing rods 30-91
Fishing tools 225-233

Floats 140-141, 154-146
Free spool reels 16-22

G

Gaffs 228
Glasses 233
Gloves 230-231, 277
Grease / oil 159
Groundbait 158

H

Hairrigs 167-169
Headlamps 232
Herring leaders 200-201
Holdalls 261-263
Hook grindstones 231
Hooks 166, 210-215

J

Jaw spreaders 228
Jerkbait rods 37
Jigheads 121, 198

K

Keeping nets 243
Knife sharpeners 230
Knives 230-231

L

Landing net handles 244-245
Landing nets 234-243
Landing pliers 230
Leader material 98, 179
Leads 223-224
Line connectors 230-231
Lines 92-103

M

Multiplier reels 23, 25-27

N

Neoprene clothing 276-277
Norway leaders 199-207
Norway pinks 193-195
Norway range 192-207

P

Perch jigs 111
Pinks 193-195
Pliers 229
Plugs 112, 122-135
Polarizing glasses 233
PVA 180-181

R

Ready rigs 157
Reels 4-29
Rod bags 261-263

Rod holders 164-165, 244-246
Rod pods 164
Rod supplies 80
Rods 30-91
Rubber stoppers 148-149

S

Salmon eggs 142
Sbirolinos 173
Sea leaders 199-208
Sea lures 193-198
Sea rods 82-91
Smoking accessories 160
Smoking oven 160
Snaps 220-222
Snelled hooks 210-213
Softlure rods 42-43
Softplastic lures 112, 120
Spare spools 29
Spinners 105-108
Spinning reels 4-11
Splitrings 222
Spoons 109, 110
Starlights 152
Steel wires 216-220
Stingers 216, 218
Stoppers 148-149
Surfcast leaders 207-208
Surfcast rods 88-91

Cormaru 7PiF

NEW

This reel convinces at first sight

Noble but nevertheless robust – the Cormaru 7PiF is a reel series for elevated demands. It provides permanent fatigue-proof fishing fun and you can be sure to net also large specimen securely. The Cormaru 7PiF is a reliable partner for many years and depending on its size is the perfect choice for fishing for pike, zander, perch and trout as well as for coarse fishing. Equipped with premium components and delivered with aluminum spare spool.

Cormaru 7PiF front drag reel

Art.-No.	model	BB	ratio	m/ømm	retrieval	wt.		
12-060100	1000	6	5.1:1	155/0.20	64cm	240g

12-060500	5000	6	5.0:1	230/0.33	84cm	390g		

Technological features

- 6 steel ball bearings
- INFINITE ANTI-REVERSE®, stageless
- Finely adjustable spool drag
- Aluminum longcast spool
- Aluminum spare spool
- Aluminum handle
- Soft-touch handle knob
- PowerBail
- Large anti-twist line roller
- Longlife bail spring

Votacor 7PiF

Impressingly strong carbon fiber

A remarkable highlight of the Votacor 7PiF is its remarkably light weight, which is based on the use of the new groundbreaking CP material, which enables the manufacturing of especially lightweight and distortion-proof reel bodies and rotors. Bodies made of CP material are lightweight and especially durable and feature a longer lifespan compared to conventional reels featuring a plastic body. Rotors made of CP material feature decreased centrifugal forces and therefore enable an especially smooth winding. The Votacor 7PiF represents the perfect example.

The revolutionary CP material is a blend of carbon and polyamide and has been especially developed for the design of lightweight as well as robust reel bodies and rotors.

Equipped with an exemplary line lay for efficient casts, a robust drag unit and power gear for smooth running. This reel is perfectly suited for the use of braided lines.

Votacor 7PiF Front drag reel

Art.-No.	model	BB	ratio	m/ømm	retrieval	wt.		
12-52200	2000	6	5.2:1	130/0.25	71cm	255g

12-52300	3000	6	5.2:1	200/0.30	78cm	275g		

Technological features

- 6 steel ball bearings
- **CP** composite body
- **CP** composite rotor
- INFINITE ANTI-REVERSE®, stageless
- Finely adjustable spool drag
- Aluminum longcast spool
- Nylon / ABS® spare spool
- CNC cut aluminum handle
- Soft-touch handle knob
- PowerBail
- Large anti-twist line roller
- Longlife bail spring

Black Bull 6PiF

The perfect reel, when reliability and robustness come first.

The Black Bull 6PiF is excelled by its outstanding price-performance ratio and – depending on the reel size – is designed for enduring application at fishing for pike, carp, trout, zander, etc.

Thanks to the machine-cut gearing and the precisely implemented axis stroke system the Black Bull 6PiF is also perfectly suited for the use of thin braided lines. The line lay is exemplary and the smooth running cares for unrestricted fishing fun.

Black Bull 6PiF front drag reel

- Finely adjustable spool drag
- Aluminum longcast spool
- Nylon / ABS® spare spool
- Large anti-twist line roller
- Longlife bail spring

Panacor 6PiF

Front drag reels with exclusive design

Expectations on a reel within this price category can't be fulfilled more masterfully. By its design and equipment, this reel fascinates even anglers, which are used to fish much more expensive reels. The sportive and dynamic shape, the compact unit of body and rotor in combination with the perfectly dimensioned spool would suite even much more expensive front drag reels.

Despite its exclusive look, it convinces with reliable technical features like the exclusive aluminum spool with hardened spool rim or the CNC cut aluminum handle. During application, the Infinite system as well as the silky-smooth running care for worrisome fishing fun.

Panacor 6PiF Front drag reel

Cortec 3PiF

Great performance - small price

The development of reliable products at a honest price-performance ratio has been the endeavor of CORMORAN since the beginnings. Also the Cortec 3PiF is no exception regarding this principle – it is literally a perfect example touching this company philosophy. The design „Made in Germany“ is of finest quality, the equipment exceeds the expectations and the function is unimpeachable. Only the price is evidently substandard.

Cortec 3PiF Front drag reel

i-COR 2PiF / 2PiR

NEW

High quality at an affordable price.

The new i-Cor 2PiF with front drag and 2 PiR with rear drag combine fishing fun and reason. These reels offer high quality, smooth running, a well-working drag and reasonable equipment at a sensational price. Even a double-anodized aluminum spare spool is supplied with this reel. It features an anti-twist line roller, which spares the line and prevents line twist reliably.

Technological features

- 1 steel ball bearing
- INFINITE ANTI-REVERSE®, stageless
- Aluminum spool
- Finely adjustable drag
- Large anti-twist line roller
- Soft-touch handle knob
- Longlife bail spring

CORCAST 7PiF Hyper Jet

Hyper Jet Super-longcast front drag reel

After the Corcast Super Jet, which reanimated the world of spinning and match reels and also did set benchmarks for future reel developments worldwide, now the Corcast Hyper Jet enters the international stage. A reel concept, which didn't exist in this manner before. Designed for long casting distances, as the Corcast Super Jet, compact as the Corcast Super Jet, technically perfect, as the Corcast Super Jet, featuring a professional drag, as the Corcast Super Jet...but now with super long Hyper Jet Super-longcast-spool and wormshaft system for perfect line lay.

WORM SHAFT SYSTEM

The perfect reel for fishing for predators with shads and plugs, for light to medium feeder fishing and for ground and float fishing over long distances.

Corcast 7PiF Hyper Jet Front drag reel

Art.-No.	model	BB	ratio	m/ømm	retrieval	wt.		
16-45178	3000	6	5.1:1	275/0.20	83cm	390g		

Line capacity main spool

210m/Ø0.25mm
150m/Ø0.30mm

Line capacity spare spool

230m/Ø0.30mm
180m/Ø0.35mm

Technological features

- 6 steel ball bearings
- INFINITE ANTI-REVERSE®, stageless
- Finely adjustable front drag
- Wormshaft oscillation system
- Hyper Jet aluminum longcast spool
- Hyper Jet aluminum spare spool
- PowerBail
- Line guard system
- CNC cut aluminum handle
- Large anti-twist line roller
- Soft-touch handle knob
- Longlife bail spring

CORCAST 6PiF Hyper Jet S

Hyper Jet Super-longcast front drag reel for saltwater-spinfishing

The new generation Corcast, especially developed for light saltwater fishing. A reel concept, which didn't exist in this manner before. Designed for long casting distances, as the Corcast Super Jet, compact as the Corcast Super Jet, technically perfect, as the Corcast Super Jet, featuring a professional drag, as the Corcast Super Jet...but now with super long Hyper Jet Super longcast spool and wormshaft system for perfect line lay. The perfect reel for fishing with shads at the Bodden as well as for fishing for sea trout and light saltwater spinfishing.

WORM SHAFT SYSTEM

The perfect reel for fishing with shads at the Bodden as well as for fishing for sea trout and light saltwater spinfishing.

HYPER JET

Hyper Jet Super longcast spools

The next stage of the Super Jet construction principle. We kept the big spool diameter but enlarged the spool length and provided it with our wormshaft system for a perfect line lay.

Comparison of three same sized spinning reels with normal spool, Super Jet spool and Hyper Jet spool.

Corcast 6PiF Hyper Jet S Front drag reel

Art.-No.	model	BB	ratio	m/ømm	retrieval	wt.		
16-45179	3000	5	5.1:1	270/0.35	83cm	390g		

Line capacity main spool

210m/Ø0.25mm
150m/Ø0.30mm

Line capacity spare spool

270m/Ø0.35mm
220m/Ø0.40mm

Technological features

- 5 „NCBB“ steel ball bearings
- INFINITE ANTI-REVERSE®, stageless
- Finely adjustable front drag
- Wormshaft oscillation system
- Hyper Jet aluminum longcast spool
- Hyper Jet aluminum spare spool
- PowerBall
- Line guard system
- CNC cut aluminum handle
- Large anti-twist line roller
- Soft-touch handle knob
- Longlife bail spring

Pitcor 5PiF

Super-Longcast reel with our „QD“ Fast Drag System

Developed for heavy freshwater fishing (pike, feeder and carp) as well as for surfcasting. Equipped with our “QD” fast drag, which can be turned from nearly open to completely closed within one turn of the drag knob. The vacant design, the compact unity of body and rotor and the super longcast spool dominate the appearance of this Big Pit longcast spool. Thanks to our special wormshaft system and the super long spool, you can achieve the casting distances you need to reach so far inaccessible spots. The power gear with the tremendous smooth running, the strong Infinite system and the reliable bail function are responsible for the overall sense of quality, which you can feel inspecting this reel.

Only one turn between run and fun

Pitcor 5PiF Super longcast reel

- Line guard system
- CNC cut aluminum handle
- Soft-touch handle knob
- PowerBail
- Large anti-twist line roller
- Longlife bail spring

Catfish reels

Big Cat Mega Lifter

Hanging Catfish multi reel

Many catfish hunters have been waiting for this hanging multiplier reel. Constructed like a multiplier reel but hanging downwards like a fixed spool reel, no special rod is needed.

Many fishermen know the advantages of a multiplier reel. But the upwards mounting and the difficult operating are scaring facts against the use of multiplier reels at catfish fishing.

The Big Cat Mega Lifter is different: constructed like a multiplier reel, but used hanging like a fixed spool reel. The clutch enables a handy and optimal drawing of the line.

The power gear is made of stainless steel and brass and is based on our open sea reels, which after all have to face the giants of the deep sea.

Left hand version

Technological features

- 5 „NCBB“ steel ball bearings
- Distortion-proof body
- Machined one-piece aluminum spool
- Precise durable gear made of brass/stainless steel
- Permanent anti-reverse - click-sound adjustable
- Lever drag system with carbon drag discs
- Automatic levelwind
- Integrated release stop lever
- Set-free lever for the spool
- Left hand version

Black Star-CBR NEW

Convincing thanks to carbon fiber

The highlight of the completely new developed Black Star CBR is the application of the ground-breaking CP material, which is reinforced with carbon fiber. This combination leads to the design of particular distortion-proof bodies and rotors. Bodies made of this material are extremely robust and do not tear as fast as conventional plastic bodies. Thus, rotors made of CP develop fewer centrifugal forces and enable a well-balanced operation.

The Black Star CBR is a free spool reel for anglers, who are not into making compromises, who have made their experiences and who know what they want.

The equipment of the Black Star CBR comprises the CORMORAN adjustable free spool system, an infinite anti-reverse system and a cut aluminum handle combined with an aluminum longcast spool.

Technological features

- 6 steel ball bearings
- **CP** composite body
- Automatic free spool system, adjustable

Cortec BR 4PiF

Exclusively designed free spool reels

Great design, reliable quality and an excellent price-performance ratio – these free spool reels for fishing for carps, eels, zanders, trouts and large breams are trendy. This series is equipped with an adjustable bite and run system, Infinite anti reverse, solid aluminum handle and a great double anodized aluminum spool. The Cortec BR 4 PiF belongs to the best reels within this price category currently available and looks like much more expensive reels.

Cormaxx BR 3PiF

Affordable free spool reels

Awesome free spools reels with irresistible price-performance ratio. The bite and run system works precisely and enables free drawing of the line. The smoothly working gear is a refreshing exception within this price category. Equipped with a high-class aluminum spool and a line-protecting anti-twist line roller.

Antera BR 4PiF

Free spool reels with aluminum body

The Antera BR 4PiF features every aspect of a high-class reel. The body is made of distortion proof „Super Metal aluminum“, the „Slow-Speed“ wormshaft oscillation provides a precise line lay and the quality of the baitrunner system is typical CORMORAN - reliable and everlasting.

ATX-BR 4PiF

Large free spool reels with slow-speed line lay

Universally applicable free spool reels available in size 5000, 6000, 8000 and 10000, which cover most fishing techniques, where big specimens are targeted. The „Slow-Speed“ Wormshaft system cares for a slow and precise line lay on the longcast spool and the gear guarantees a high power transmission.

Equipped with cold forged aluminum spool and a drag you fully can rely on during the fight with the fish.

PRO CARP

Pro Carp GBR 6PiF

Big Pit free spool reel for professional carp anglers

The Pro Carp GBR unambiguously sets a benchmark and emphasizes its aspiration by its powerful design. By conception, it is a typical free spool reel, but nevertheless features some different characteristics.

Pro Carp GBR 6PiF Big Pit Free spool reel

Art.-No.	model	BB	ratio	m/ømm	retrieval	wt.

- CNC cut aluminum handle
- Soft-touch handle knob
- PowerBail
- Large anti-twist line roller
- Longlife bail spring

Seacor XP 5PiF

Big fish reel for saltwater fishing

Developed for saltwater fishing - all parts are special coated and saltwaterproof.

Equipped with 4 stainless „NCBB“ steel ball bearings.

Thanks to the special wormshaft system, the superlong spool offers a perfect and harmonic line lay and thus the Seacor XP reels are perfect surfcast reels for extremely long casts. The power gear with a tremendous smooth running, the strong Infinite system and the reliable bail function guarantee an extremely long and reliable reel lifespan.

Seacor XP 5PiF Super Longcast reel

- Strong spool drag
- Wormshaft oscillation system
- Aluminum longcast spool
- Nylon / ABS® super longcast spare spool
- Line guard system
- Aluminum handle
- Soft-touch handle knob
- PowerBail
- Large anti-twist line roller
- Longlife bail spring

Corboss 640LLC Left hand model

NEW

Good that the Corboss is a multiplier reel.
Pleasant that it is used „hanging“ like a fixed spool reel.
Amazing that it is even more functional to handle than a fixed spool reel.

Hanging multiplier reel with „Lever Drag“ and integrated line counter.

Designed like a multiplier reel but hanging downwards like a fixed spool reel, no special rod is needed. Many fishermen know the advantages of a multiplier reel for boat and catfish fishing. But the upwards mounting and the difficult operation scare many fishermen.

The Corboss 640LLC is different: Designed like a multiplier reel, but used hanging as a fixed spool reel it can be applied with every rod. The clutch enables a handy and optimal control regarding lure action and fishing depth. The power gear is made of stainless steel and brass and is based on our open sea reels, which anyhow have to face the giants of the deep sea.

Line capacity monofilament

330m/Ø0.45mm

280m/Ø0.50mm

Line capacity braid

400-430m/Ø0.30mm

320-350m/Ø0.35mm

Corboss 640LLC

Art.-No.	model	BB	ratio	m/ømm	retrieval	wt.		
18-4006	640LLC	5	4.5:1	330/0.45	85cm	730g		

Functioning of lever drag and clutch

1 Pull the clutch to the top and hold it (drags spool completely).

2 Push the lever drag down - the free spool mechanism is activated and the bait immediately gains depth when you let the clutch slide back into its initial position.

3 By using the clutch you can control the sinking of the bait steplessly - retard as you like or stop the bait at a desired depth by pulling the clutch upwards.

4 When the desired depth is reached, pull the clutch to the top to disable the free spool function. The drag gets stronger, the further the lever drag is pulled to the top - drag adjusting can't be simpler.

Technological features

- 5 „NCBB“ steel ball bearings
- Distortion-proof body
- Precise durable gear made of brass/stainless steel
- Machined one-piece aluminum spool
- Integrated line counter, displays meters
- Permanent anti-reverse - click-sound adjustable
- Lever drag system with carbon drag discs
- Automatic levelwind
- Integrated release stop lever
- Saltwater resistant
- Left hand version

Seacor 210 Left hand version

Strong, robust multiplier reel with excellent price-performance ratio.

To maintain control even in critical moments and to be able to rely on your reel at any moment – these were the basics which led to the development of the Seacor 210 reels. The single piece, distortion-proof frame is the most important element for strength and distortion-proofness under highest strains. Like this the power gear, with its huge traction wheel and the strong brass axis can generate great retrieving power and is protected against overload via a double-stopping system. The robust, double-bearred line lay positions the line smooth and unagitated on the ball bearing aluminum spool even under maximum strains. The drag power is quickly adjusted via the handy star wheel even during tricky fights with the fish. The supersized carbon fiber drag discs generate tremendous drag power, which are especially necessary with braided lines. If you are fishing with thinner lines, you will soon treasure the smooth drag function, because it ensures a secure fight with the fish. A further highlight of the Seacor 210 is its finely adjustable free spool drag, which enables a fast but controlled sinking of the lure. Of course the Seacor 210 reels are equipped with stainless “NCBB” steel ball bearings, which care for a long lifespan.

Model Seacor 210L: left hand version

Model Seacor 210LLC: left hand version with line counter

On this picture you see the difference between the traction wheel and the drag discs as they are used in many standard multiplier reels and in the Seacor 210.

The traction reel of the Seacor 210 is sweeping big and robust ($\varnothing 50\text{mm}$) and the supersized drag discs ($\varnothing 35\text{mm}$) made of metal and carbon fiber do their job in a smooth, robust and reliable way thanks to the large contact area between the drag discs.

On this picture you see the difference between the axis and the drag wheel as they are used in many standard multiplier reels and in the Seacor 210.

The axis of the Seacor 210 is extremely strong ($\varnothing 10\text{mm}$), the drag wheel is supersized with 18 drag cavities and we used a double-stopping-system which ensures safety and is made for a long lifespan.

Technological features

- 3 „NCBB“ steel ball bearings
- Distortion-proof, one-piece construction
- Gear made of brass and steel
- Extra thick brass axis
- Machined one-piece aluminum spool
- Dual stopper system
- Double-bearred line lay
- Hardened steel levelwind
- Carbon fiber drag discs
- Star drag
- Adjustable free spool
- Saltwater resistant
- Left hand version

The robust and double-bearred line lay cares for an unagitated and even line wrap on the aluminum spool even at maximum strain.

ERFOLG DURCH TECHNIK

CP CARBON POLYAMIDE
The new revolutionary CP material is a composite of carbon and polyamide and has been especially developed for the design of lightweight as well as robust reel bodies and rotors.

SUPER METAL BODY

SUPER METAL BODY

The reel body is made of super lightweight, wear resistant aluminium, that guarantees optimal strength and a high lifetime. What causes sensation among automotive engineering is a standard for CORMORAN since years - lightweight, corrosion resistant aluminium for the body.

NCBB Bearings - made for saltwater

The NCBB Bearings (Non Corrosion Ball Bearings) are rust-free high-tech bearings made of Stainless Steel and are specially developed for the use in saltwater. They are used in all our saltwater resistant reels.

WORM SHAFT SYSTEM

Wormshaft Oscillation

The CORMORAN wormshaft system is very precisely CNC cut. Smallest possible tolerances ensure highest precision and the greatest possible lifetime, which features all of our reels with a wormshaft system.

INFINITE ANTI REVERSE

Nevertheless today most reels feature such a system, there are huge differences concerning the construction and the used materials.

Please pay attention to the INFINITE sign, since it stands for a perfect anti reverse.

CARBON drag discs

The carbon drag discs dramatically improve the drag performance and ensure a smooth drawing of the line.

Super Longcast Spools

Very elaborate super longcast spools for big fish, carp, and surf reels in combination with our Wormshaft system, which ensures precise line winding. Extreme long casts are possible with these spools.

QD FAST DRAG

The built in free spool function. Only a single rotation of the drag knob from maximal drag power to complete loose drag - a perfect system for carp anglers.

LINE GUARD PROTECTOR

The Line Guard Protector is placed on both sides of the rotor and prevents tanglings around the shaft.

Longlife Bail spring

A „must-have“ for a premium reel - fractions are nearly impossible with this construction.

PowerBail, which resists deformation and twisting even under permanent load.

Big Anti-Twist line roller

Reduces line twist at retrieving thanks to a special construction - the line is led pointedly on the line roller and can't escape back and forth as with earlier line rollers.

Black Bull NEW

The new Black Bull – fully optimized

During the development of the new Black Bull rods we focused on the action. It was the aim to develop lightweight and ultra-fast rods, which remain in the same, affordable price range as the previous Black Bull series. No simple task, because the construction of the blank is increasingly elaborate as the blank is getting faster and the use of latest carbon fiber is inalienable. Fishing one of the new Black Bull rods, you will immediately feel the difference to the predecessors – they have a faster action, a greater resilience, enable longer and more precise casts and hook even more rapidly. Due to the fast actions also all guides had to be completely adjusted to optimize the line lay and to reach a perfect power transmission to the blank. Also the handle and the handle length have been adapted and an original Fuji screw-winch reel seat ensures the perfect fit of the reel.

NEW Black Bull Light Spin

Sensitive, ultra-modern spinning rod with fast action for fishing for trout, perch, chub etc. with small to medium softplastic lures as plugs, spinners, small spoons and jigs. It's a highlight to cast, retrieve and set the hook with these rods, but fighting a big predator with this sensitive rod excels everything.

NEW Black Bull Spin & Jig

Wonderful lightweight rods with distinct tip action for spin fishing for trout, perch, chub etc. Especially small shads, twisters and jigs can be presented lifelike with these two rods. But the Spin & Jig does not only know to put life into these lures, but also is the proper choice to present Drop Shot rigs or small plugs in a very tempting way.

Technological features

- SM24 Carbon fiber blank
- Super fast action
- Fuji® reel seat
- Lightweight SiC guides
- Cork handle
- Exclusive design
- Cloth bag

Reel seat

NEW Black Bull Spin

The new Black Bull spinning rods are a class of their own, as you will immediately recognize when fishing them for the first time. You literally can feel the power: at casting, at setting the hook as well as at fighting with the fish. These rods are rather stiff and feature a fast and pronounced tip action. Therefore, they are perfectly suitable for fishing with shads and plugs. The high processing quality and the premium equipment will already delight you at the fishing shop.

NEW Black Bull Heavy Spin

The perfect softlure rod with a fast tip action. The presentation of large shads at any depth or distance is supported by the stiff action. This rod won't leave you behind in any situation.

NEW Black Bull Spin&Seatrout

Especially at this rod type, long casts against the wind belong to the standard repertoire. Therefore, a blank that supports the fisherman is required. These properties in combination with a special arrangement of the lightweight SiC guides are implemented at the Black Bull Spin&Seatrout thanks to the particular blank construction.

NEW Black Bull Jet Spin

These travel rods convince with its very short closed length and with its action, which is comparable with a two-sectioned spinning rod. The arrangement of the lightweight SiC-guides supports the progressive power transmission, which enables dynamic casts, a fast setting of the hook and a forced fight with the fish. These rods are not only recommended for travelers.

K-DON

K-Don rods make your lures dance!

Concerning modern lure fishing we have a clear philosophy - we don't like compromising and are really not into setting limits.

You will immediately realize, that we didn't had to do either with K-DON, when fishing a K-DON rod. Another aspect has been the foundation for the development of the K-DON rod program - we think, and experience shows it, that big catches are no coincidence. Fishing skills and knowledge about the rules of the underwater world is one side, appropriate tackle and the ability to draw attention to modern lures is the other. We listened carefully to our international predator anglers and brought it in accordance with our own experiences. We proudly can say, that the adoption of the K-DON rods to modern angling methods has been perfectly successful.

Technological features

- SM24 Carbon fiber blank
- Super fast action
- Sensi-touch screw-winch reel seat
- Lightweight SiC guides
- Cork handle
- Cloth bag

K-DON Twitch & Spin

Highly modern short spinning rods for advanced spin fishing for zander, pike, perch or trout. Perfectly conceived for giving action to plugs, jigs and other lures of latest fashion. Features a strong backbone that provides fast hooking and guarantees fun during the fight with the fish. The Twitch & Spin are lightweight and perfectly balanced to enable fatigue-proof fishing for hours.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
22-0025195	1.95m	5-25g	104cm	2	120g	7		
22-0028215	2.10m	7-28g	111cm	2	125g	7		
22-0038245	2.40m	10-38g	126cm	2	165g	8		

K-DON Power Spin

These spinning rods for fishing from the boat and the shore are equipped with an ultra-fast rod tip, which enables a precise and delicate lure presentation as well as sensitive bite detection. The strong backbone is of special advantage, when a large specimen is hooked. This rod allows you to build up much pressure to tire the fish quickly for a safe landing.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0050245	2.40m	15-50g	126cm	2	180g	8

22-0060275	2.70m	30-60g	141cm	2	205g	8		

K-DON V-Jig Vertical Spin

Especially designed for spinning reels. The K-DON V-Jig is particularly designed for vertical fishing. The special reel seat significantly improves detection of even very soft bites. We did put special emphasis at the fighting qualities of the V-Jig, which eliminates losses during the fight with the fish nearly completely due to the special blank construction. The variable counterweights are a „must-have“ and guarantee fatigue-proof fishing for hours.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0032185	1.85m	14-32g	98cm	2	100g	9		

K-DON V-Jig Vertical Baitcast

Especially designed for multiplier reels. Highly sensitive at lure presentation and at bite detection. We did put special emphasis at the fighting qualities of the V-Jig, which eliminates losses during the fight with the fish nearly completely due to the special blank construction. The variable counterweights are a „must-have“ and guarantee fatigue-proof fishing for hours.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0033185	1.85m	14-32g	98cm	2	105g	9		

K-DON Cast & Troll

The ideal combination of casting and trolling rod for baitcast reels. Equipped with a progressive semi-parabolic action, these rods provide the lure with much action and scatter the power progressively from the tip to the handle. Beyond trolling, the Cast & Troll is also perfectly applicable for casting and presenting large plugs and shads.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides

Spin and predator rods

K-DON Crank Jigger

The fast and distinct tip action is perfectly suited to provide small shads, plugs, twisters, spoons and spinners with a vivid action. The slim blank features a pleasant handling and has enough power to resist trout, perch and zander.

Art-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0028275	2.70m	14-28g	141cm	2	170g	8		

K-DON Baitjigger 2.40m

K-DON Baitjigger 2.40m

Especially developed for fishing with medium plastic lures for pike and zander. Super slim blank, tough tip and a handle, which resists all kinds of strain. Above all you will be amazed about the rod's weight, which enables an effortless fishing for hours. With this rod you are able to animate your plastic lure and thus force even shiest predators to attack it. If you believe or not: thanks to its special construction and dynamic, this rod is even able to cast lightweight lures as spinner over great distances.

Art-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0071245	2.40m	30-70g	126cm	2	175g	8		

K-DON Baitjigger 2.70m

K-DON Baitjigger 2.70m

The stiff K-DON for fishing with big plastic lures for pike and zander. You even can cast biggest plastic lures with big jigheads easily and present them in a way to show their inherent action. Nevertheless this rod is amazing sensitive – a prerequisite man other stiff rods can't fulfill.

Art-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0101275	2.70m	40-100g	141cm	2	225g	8		

K-DON Troller

Innovative rod for trolling big lures at large lakes and dams. Equipped with strong backbone and a sensitive as well as dynamic tip.

Art-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0125305	3.05m	40-125g	156cm	2	255g	8		

K-DON Twitch & Cast

The Twitch & Cast features a stiff backbone and has especially been developed for an active lure presentation and targeted casts. Despite its stiff interpretation this rod is extraordinary sensitive and provides straight contact to the other end of the line. Perfect for twitching modern lures

Art-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0038195	1.95m	8-38g	103cm	2	125g	9		

K-DON Drop Shot

These rods are distinguished by their convenient handling, direct lure contact and strong backbone. Even softest bites are reliably indicated by these rods. Applicable from the boat as well as from the shore.

Art-No.	length	CW	d. lgth.	parts	wt.	guides		
22-0030215	2.10m	3-30g	111cm	2	97g	8		

K-DON Jerk Spin

Two jerkbait rods of outstanding quality available in two casting weight classes, which cover the whole spectrum of jerkbaits. The fast and stiff tip and the strong backbone eject the lure far and precisely and allow an accurate lure presentation. When a fish is hooked, the strong backbone and the parabolic bending curve have enough strength to force even hard fighting predators.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
22-0080195	1.95m	40-80g	103cm	2	145g	7		
22-0120195	1.95m	50-120g	103cm	2	155g	7		

K-DON Jerk Baitcast

Two jerkbait rods for multiplier reel available in two casting weight classes, which cover the whole spectrum of jerkbaits. The fast and stiff tip and the strong backbone eject the lure far and precisely and allow an accurate lure presentation. When a fish is hooked, the strong backbone and the parabolic bending curve have enough strength to force even hard fighting predators.

22-0121195	1.95m	50-120g	103cm	2	145g	10		

For outsmarting perch, trout and chub with small plugs, jigs, mini spoons or spinners up to size 2. The more sensitive and handy the rod, the more fun you have at fishing with ultra-light lures.

Motala 180 TX4-MO 9180

Ultralight, extremely handy spin rod for much fun at the water. Highly sensitive action for a perfect lure control.

TX4 Action: ULTRALIGHT

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
21-0009180	1.80m	1-9g	96cm	2	105g	7		

Jaala 210 TX4-JA 12210

For the increasingly popular fishing with light tackle and small lures for perch and trout. Delicacy of feeling is everything at this fishing technique.

TX4 Action: ULTRALIGHT

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
21-0012210	2.10m	2-12g	111cm	2	110g	7		

Sira 195 TX4-SI 25190

This rod is a real all-rounder! Casting lures up to 20g perfectly, presenting your plug with a lifelike action or setting the hook instantaneously - no problem for the Sira 195.

TX4 Action: EXTRA FAST

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides

G CONCEPT COR-PS

COR-PS

Design and technology perfectly combined

Latest technology and a sporty-elegant design: .with this combination we redefine the first class of fishing rods in our way. With the COR-PS rods we make use of all our advanced technology at modern blank construction and combine it with masterful design, which rests upon old craftsmanship and delivers personality to every rod. The results are fishing rods, which exceptionally reflect the spirit of the time and fulfill every demand of a professional angler.

COR-PS Ultra Light Spin

Designed for the increasingly popular light fishing with small lures for trout, perch or chub. Very sensitive and ultra-fast action for a perfect lure presentation.

Art-No.	length	CW	cl. lgth.	parts	wt.	guides

Corman GTS

These rods personify the age of modern fishing for predators like no other series

The Corman GTS rods are the result of four steps of development – one as important as the other. The design, the carbon fiber material, the construction and the production are influenced by latest technology and traditional craftsmanship. You will find classical rod architecture in every detail of the Corman GTS rods. State-of-the-art materials and methods of production enable an ultra-fast action and power, that you will feel in every casting and fighting situation.

The spliced-in carbon fiber tip is a highly sensitive bite indicator, which also detects softest taps.

NEW Corman-GTS Trout & Perch

Highly sophisticated rods for light fishing for perch and trout with small lures. The spliced-in carbon fiber tip reliably indicates also softest taps and transmits them over the Hi-Modulus carbon fiber blank till the sensitive EVA-handle. Thus, you instantly can respond to every bite and set the hook without delay. The 2.60m model is also exceptionally well-suited for fishing for perch with natural baits.

NEW Corman-GTS Ultra Light

Especially developed for fishing with finesse lures and other mini lures. The soft, spliced-in carbon fiber tip is a highly sensitive bite indicator, which also detects softest taps. The High-Modulus carbon fiber blank enables an immediate transfer of the impulse to the handle. Thanks to the different rod lengths available you can choose a version, which fits your need best.

NEW Corman-GTS Zander Lure

Outstanding zander rods, especially developed for fishing with softplastic lures. Thanks to the High-Modulus carbon fiber material these ultra-fast rods are pretty stiff but very lightweight and well balanced at the same time. Thus they ensure long and easy casts also with big lures, a perfect lure presentation and a sensitive bite indication, which has priority when fishing for zander. Also recommended: the absorbing properties of the blank and the ability to hook the fish easily and securely. The powerful version with a casting weight of 50-100g is also perfectly suited for fishing for pike with softplastic lures.

NEW Corman-GTS Lure Champ

Powerful spinning rod with ultra-fast tip action for fishing for all kinds of bigger predators like pike and zander. These rod is universally suited for fishing with nearly all kinds of popular softplastic lures. The premium High-Modulus carbon fiber construction enables great casting distances, forms a perfect action and shows its power during the fight with the fish.

CORMORAN Softlure

Premium soft plastic lure rods

CORMORAN Softlure is a rod series, which comprises 4 different versions for the same fishing technique – targeted fishing for pike and zander with soft plastic lures. Made of HMC Hi-Modulus carbon, these rods are lightweight, stiff and extremely powerful, but nevertheless they differ regarding their fine tuning, equipment and design. Of course they all have a fast tip action and a powerful backbone – but with different intensities and priorities.

CORMORAN Softlure-GTS

Especially stiff and fast softlure rods for an optimal lure presentation. Since a vivid lure action is achieved primarily via the rod movement, the Softlure-GTS – despite its stiffness and robustness – is well-balanced and enables fatigue-proof fishing. The blank is featured with a scratch-proof coating, which protects the rod also during the rough conditions at boat fishing. Equipped with cork handle and SiC guides, which are designed for the use of braided lines.

CORMORAN Softlure-RS

Stiff and fast softlure rods with fast tip action. The design of the HMC High Modulus Blank is focused on a high robustness and breaking strength. Thus, this rod is also applicable for uncompromising application at predator fishing. The Softlure-RS forgives also rough handling. Equipped with a two-sectioned very convenient EVA handle of outstanding class and functional screw-winch reel seat. The SiC double leg guides are very robust and designed for the use of braided lines.

CORMORAN Softlure-STi

At jigging with shads, the lure is permanently brought into action by the rod. As logical consequence, a softlure rod has to be lightweight and should enable fatigue-proof fishing for hours. The Softlure-STi features a stiff, very fast tip action, which – thanks to its „Ultra Taper Tip“ – reacts very sensitive to everything, which happens at the other end of the line. This rod enables you to „feel“ the bottom structure very easily, which is of essential importance for beginners as well as specialists. Even hard to detect bites and softest taps are transmitted instantly. Equipped with cork handle, Fuji screw-winch reel seat and Fuji guides.

CORMORAN Softlure-HF

The Softlure HF rods are especially designed for the use of small to medium-sized shads and jigs. They feature an Ultra-Speed action, which enables long casts also with lightweight lures and furthermore ensures instant control. The Ultra-Speed tip reacts very sensitive to everything, which happens at the other end of the line. It helps you to scan the bottom structure and therefore significantly contributes to the fishing success. Equipped with a two-sectioned, very convenient EVA-handle and sensi-touch screw-winch reel seat. The lightweight and distortion-proof SiC guides are designed for the use of braided lines.

Black Master

Expectations regarding affordable carbon fiber rods can't be satisfied more masterfully.

Designing affordable quality products is very often a harder task than designing pricy products, where you can choose from the whole range of materials and components. When planning the BLACK MASTER series we kept by well established principles and combined them with new elements. The High Strength SM 20 carbon fiber sets the basis for the low weight, the good balance and the dynamic action. We were able to renew the manufacturing process, and as a consequence these rods attain a quality standard, which is an exception within this price category.

Beyond the cork handle and the lightweight SiC guides, also a solid and functional screw-in reel seat belongs to the equipment package of the Black Master. The lightweight and robust blank, which is made of SM20 carbon fiber, is protected by a cloth bag during transportation.

Black Master Jiggerspin

Classic and extremely sensitive spinning rods with fast tip action for fishing with small and smallest lure, first of all small plugs and shads. Very well applicable also for drop shotting.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
27-0018270	2.70m	3-18g	138cm	2	175g	9

27-0035270	2.70m	8-35g	138cm	2	185g	9		

Black Master Allround

These rods are real all-rounders – they easily cast lures up to 45g, but also convince at long casts with lures of 60g. Developed for carp and ground fishing in lakes and rivers.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
27-0060301	3.00m	20-60g	107cm	3	240g	6

27-0060391	3.90m	20-60g	138cm	3	315g	8		

Black Master Spin

Black Master Spin 5-25g

Developed for light spin fishing for trout, perch and chub etc. Especially small lures like spinners, jigs and small plugs are very easy to handle with these rods. The 2.70m rod is also an ideal real bait rod for perch fishing.

Black Master Spin 10-40g

Perfect rod for medium-sized plugs, shads or spoons and also bigger spinners. Universally applicable for all larger predators like pike, zander, big perches or trouts in shallow waters.

Black Master Spin 20-60g

These are real all-round spinning rods for larger lures. For pike and zander, in currents and lakes - nearly all fields of application are covered with this rod.

Black Master Spin 35-80g

Strong predator rods for big lures and big fishes. Thanks to its casting weight this rod is ideally applicable for fishing in rivers and for boat fishing for pike. The Black master Spin 35-80g is also the perfect choice for fishing in rivers with natural baits.

Black Master Spin 40-125g

Solid rod for spin and all-round fishing in fresh and salt water.

Black Master Spin 50-180g

Strong rod for spin and all-round fishing as well as for targeting big fish in salt and fresh water.

Red Master

Modern spin fishing in an affordable shape

These rods are the perfect choice for all predator hunters, who are into modern fishing techniques like drop shotting, twitching, jerkbaiting or fishing with the Texas- and Carolina-rig. The RED MASTER is also very well applicable for mini plugs and jigs and features an astonishing price-performance ratio. Tailored for these techniques, the rods additionally feature a good balance combined with high-class design.

Red Master Drop Shot

Especially developed for drop shotting from the boat (2.30m version) and from the bank. Both rods allow a sensitive lure control and provide a direct contact due to the strong backbone. Even softest bites are indicated thanks to the special tip construction.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
27-0030231	2.30m	3-30g	118cm	2	145g	7		
27-0030271	2.70m	3-30g	138cm	2	180g	8		

Red Master Twitch & Spin

Super fast short spinning rod for modern spin fishing for zander, perch and pike. Particularly plugs up to 12cm, topwater and crankbaits can be presented lifelike by short strokes. Due to the solid backbone the hooking takes place without delay. The Twitch & Spin furthermore is perfectly applicable for all other medium sized lures.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
27-0038211	2.15m	10-38g	111cm	2	120g	6		

Red Master Spin

Ultra-fast spinning rods, which are hard to find within this price-category. Thanks to special super-progressive action you can cast your lures to great distances and provide them with a lifelike action. The action also helps to tire the fish during the fight.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
27-0030242	2.40m	10-30g	123cm	2	140g	7		
27-0040242	2.40m	15-45g	123cm	2	140g	7		
27-0040272	2.70m	15-45g	138cm	2	175g	7		
27-0060242	2.40m	20-60g	123cm	2	170g	7		
27-0060272	2.70m	20-60g	138cm	2	210g	7		

Red Master Trout & Perch

Fishing with small plugs for perch, trout or zander requires a special lure presentation in order to be more successful compared to uniform retrieval. Also this method can occasionally be successful, especially when short stops are made, but twitching and jerkbaiting with short modern special rods has proven to be much more successful. These rods are also very well applicable for fishing with jigs, small shads, spoons and spinners. A fast action generally has many advantages in contrast to a soft and slow rod, but doesn't necessarily mean stiff, also if this can be suspected at the first impression.

The Trout & Perch shows its qualities during lure presentation, hooking and during the fight with the fish.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
27-0015201	2.05m	2-15g	105cm	2	95g	6		
27-0028201	2.05m	3-28g	105cm	2	105g	6		

Red Master Ultra Light Spin

Extremely sensitive, highly modern spinning rods for fishing with small and smallest lures. Even the fight with a small fish is sensational with these rods - but on the other hand you can be sure that these rods can also cope with real big fishes. Perfect for fishing for perch, trout and chub.

The Red Master Ultra Light are conceived for mini plugs, spinners of size 0-2, small spoons and jigs. They allow an optimal lure presentation and feature remarkable power reserves, which you won't expect at rods with such sensitive action.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
27-0009181	1.80m	1-9g	95cm	2	105g	6		
27-0009211	2.10m	1-9g	110cm	2	125g	6

27-0015221	2.25m	3-15g	116cm	2	140g	7		

i-COR 2 i-COR 6

Ultra fast, ultra strong and lightweight. This features usually characterize expensive carbon fiber rods... and from now on also our new i-COR series, made of „High Density Glassfiber Composite“ material.

The i-COR rods are the ideal series for predator anglers, which are looking for great rods at a reasonable price. Thanks to the „High Density Glassfiber Composite“ technology (HDG composite) we once again succeeded – even within this price category – at designing well balanced and slim rods with fast actions, which can be applied for modern lure fishing with plugs and shads.

Regardless where and with what kind of lure you are fishing, the i-COR series certainly offers the proper model, which serves your demands.

The i-COR is available in 2 versions; as i-COR 2 with cork handle and as i-COR 6 with EVA handle.

i-COR 2 Equipped with cork handle

i-COR 6 Equipped with EVA handle

i-COR 2 Ultra Fast Spin

Short and ultra-fast spinning rods for modern spin fishing for trout, perch and chub with small to medium lures. All modern lures like jigs, small shads, mini spoons or plugs, which require proper presentation, can perfectly be fished with this rod. The rod is well balanced and enables fatigue-proof fishing.

Equipped with „High Frame“ single leg guides.

i-COR 2

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
23-025181	1.83m	7-25g	95cm	2	105g	6		
23-021211	2.13m	3-21g	109cm	2	115g	7		
23-028211	2.13m	7-28g	109cm	2	120g	7		

i-COR 2 Ultra Fast Spin - Light Action

Developed for predator hunters, which prefer longer rods at light spin fishing for trout, perch, chub etc. Despite their length, both rods feature a fast action and enable long casts. Additionally the hook can be set instantly.

Equipped with „High Frame“ single leg guides.

i-COR 2

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
23-029241	2.43m	7-28g	127cm	2	155g	7		
23-025271	2.73m	15-25g	142cm	2	195g	8		

i-COR 2 Ultra Fast Spin - Medium Action

We designed these rods for all larger lures, which can be cast and presented optimally thanks to the special blank construction. When you take these rods in your own hands, you immediately will recognize the difference to classical spinning rods with their hard handle and soft tip. These are overchallenged most of the times when modern lures shall be presented in targeted and variable way, comprising retrieve stops, short but strong strokes and energetic jiggig moves.

Equipped with single leg guides, the starter guide is a double leg guide.

i-COR 2

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
23-040241	2.43m	10-40g	127cm	2	170g	7		
23-040251	2.58m	10-40g	135cm	2	180g	7		
23-040271	2.73m	10-40g	142cm	2	210g	8		

i-COR 2 Ultra Fast Spin - Strong Action

If you are unsatisfied with the performance of your current spinning rod, since you have the impression that it is overchallenged at casting, lacks appropriate lure control and is additionally missing strength, you should consider a rod with a different kind of blank construction – like these i-COR 2 rods. The built-in strength and energy is equally distributed over the whole blank, and therefore the action opens up during the fight with the fish from tip to handle. An awesome rod that masters every situation.

Equipped with double leg guides.

Trout rods

Big Trout

Especially developed for trout fishing at ponds and lakes. Made of X-power carbon and equipped with lightweight SiC guides.

The new Big Trout rods are equipped with a handle combination of cork and EVA, an ergonomic screw-in reel seat and lightweight SiC guides.

Big Trout Lake 28

Thanks to a casting weight of 5-28g even long casting distances can be reached with the „Lake 28“. Nevertheless, it is sensitive enough for short distance fishing. Therefore it is applicable for all type of waters and most ponds. The rod action is designed for medium heavy pond fishing techniques. The fast and delicate tip provides the bait with a very seductive action, if the tremarella method is applied. Thanks to the strong backbone even bigger trematrotas, bombardas and sbirolinos can be cast perfectly to long distances with the „Lake 28“. It convinces also at fishing with floats, swimming sbirolinos or water bubbles, if trouts are hunting close to the surface. The perfect line diameter for this rod is \varnothing 0.18mm or 0.20mm. The X-power carbon provides much power and enables sensitive fishing at the same time. Within this price category the „Lake 28“ sets a real benchmark.

i-COR 6 Ultra Fast Spin

These are wonderful rods with a harmonic bending curve from the tip to the handle section. With this tool you don't have to be afraid of fighting with large specimen – these rods keep their promises in every situation and build up an incredible force, which tires every fighting fish quickly.

i-COR 6

Big Trout Lake 38

The power trout rod with real longcasting qualities. Perfectly suited for casting large sbirolinos, trematrotas and bombardas to very remote spots, where often the biggest trouts hide in ponds and big lakes. During the fight with the fish you can exert much pressure till the successful netting of the trout. The „Lake 38“ is also made for drift fishing with longcast trout floats in order to cover large water areas. If fishes are spotted at the surface, just cast over the spot (thanks to the special blank construction very long and precise casts are possible) and retrieve the rig slowly till the spotted fish. As soon as the heavy float disappears, you can set a piercing hook thanks to the X-Power carbon construction. Also at fishing with floating sbirolinos or bombardas over long distances, the „Lake 38“ is the proper rod. The perfect line diameter for this rod is 0.18mm, 0.20mm und 0.23mm.

NEW Big Trout Sbiro Power

Longcast Sbirolino rod, which has been designed especially for targeted fishing for trouts in large ponds and for sea trouts. If you belong to the group of specialists, which successfully applies heavy Sbirolinos also at pike and zander fishing, you also should have a closer look at the Big Trout Sbiro Power. Also heavy rigs can be cast very long with ease. If you then receive a bite on a long distance, the strong backbone enables a fast hooking.

NEW Big Trout Tremarella Tele

Wonderful lightweight and perfectly balanced trout rods with a sensitive and fast tip action for the targeted fishing with Tremarellas for trouts. This rod will delight all fans of this incredibly successful fishing technique. Equipped with stand-away SiC guides.

NEW Big Trout Sbiro Tele

Very sensitive Sbirolino rods for trout fishing in ponds as well as for fishing for perch. This rod is very lightweight and features a remarkably sensitive tip made of carbon fiber, which indicates also soft bites reliably. Equipped with stand-away SiC guides.

Catfish Rods

Big Cat Power Lifter

They don't have to be costly, but functional! Strong, indestructible and equipped with a great action - that is what we expect from a functional catfish rod. And when it is as good equipped as the Big Cat Power Lifter, the affordable catfish rod is perfect. Made of high density composite (HDG) and equipped with SiC guides, an extra strong high-class reel seat, which is suited for multiplier and fixed spool reels and an ergonomic EVA handle.

Big Cat Mega Lifter

Made of High Power SM24C carbon, which enables the blank to conquer every catfish during the fight with the fish. The MEGA LIFTER catfish rods empower you to stand up to the fish thanks to the fast capacity of reaction. The pressure, which can be attained with these rods is enormous. Features SiC guides, aluminum reel seat and cork handle.

Big Cat Mega Lifter Bank catfish rods

Highly strainable and robust catfish rod for fishing with pellets floater-rigs or with the catfish buoy - this rod covers all techniques which are applied from the bank and thus can be called a real all-rounder. The perfectly shaped handle contributes to the prevention of cramps during the fight with the fish. Featured with

Big Cat Mega Lifter Light boat catfish rods

Catfish rod, especially designed for waters with predominantly small to medium sized catfishes, where conventional catfish rods with a casting weight up to 400g really are out of place. Fighting with a small catfish using such a rod doesn't really make sense or fun.

The Big Cat Power Lifter rods are equipped with strong SiC guides, which protect the line, and an strong reel seat, which can be used with spinning reels as well as multiplier reels. Features an ergonomic EVA handle.

Carp Rods

PRO CARP **AKX**

Carp rods for nearly all fields of application. The high quality standards of these markedly elegant and powerful carbon fiber rods in connection with the classy equipment suggest a much higher price.

The rod name is directly engraved into the blank. The action is designed according to the most recent insights of the international carp scene, to enable long and targeted casts but also provide enough power reserves during the fight with big carps. The extremely slim blank is a real eye catcher. Equipped with lightweight SiC guides and the special Pro Carp Sensi-Touch reel seat, which features a very convenient handling and enables direct contact to the blank.

AKX 2-Section Carp

The AKX sets a benchmark within this price range. It will get the overall concept for many other rods within this price segment. The Pro Carp sensi-touch reel seat is singular and you will hardly find an engraved rod-logo at other rods in this price range.

Art.-No.	length	TC	d. lgth.	parts	wt.	guides		
20-0930360	3.60m	3.00lb	187cm	2	295g	6		
20-0935390	3.90m	3.50lb	200cm	2	375g	6		

AKX 2-Section Carp with cork handle

Carp rods with classic cork handle are getting increasingly popular again. Of course also these rods feature the Pro Carp sensi-touch reel seat and feature a blank with engraved logo.

Art.-No.	length	TC	d. lgth.	parts	wt.	guides		
20-0930363	3.60m	3.00lb	187cm	2	305g	6		
20-0935363	3.60m	3.50lb	187cm	2	325g	6		

Technological features

- SM24 Carbon fiber blank
- Sensi-touch screw-winch reel seat
- SiC guides
- Ergonomic buttgrip
- Engraved rod name
- Cloth bag, black

The Sensi-Touch reel seat enables a direct contact with the blank for highest sensitivity.

The Pro Carp AKX rods feature a spigot joint connection, which does not interfere with the bending curve.

AKX Multi Section Carp

These multi-piece rods are first-class carp rods, which satisfy even high demands. Their action is based on the test curves of 2-piece carp rods.

Art.-No.	length	TC	d. lgth.	parts	wt.	guides		
20-0930361	3.60m	3.00lb	127cm	3	295g	6		
20-0935361	3.60m	3.50lb	127cm	3	325g	6		

AKX Spod Carp

Designed for targeted long casts of large spods - the AKX Spod Carp is an extraordinary longcast rod, which displays astonishing casting characteristics at optimal and effortless loading.

Art.-No.	length	TC	d. lgth.	parts	wt.	guides

PRO CARP

Pro Carp Black

The Pro Carp Black is distinguished by an excellent price-performance ratio and resembles much pricier carp rods regarding its design.

Technological features

- SM24 Carbon fiber blank
- Ergonomic screw-winch reel seat
- SiC guides
- Hard EVA handle
- Cloth bag, black

High power reserves and real longcast characteristics are additional highlights of this series. During the fight with the fish, the tip action is continued till the handle section, buffering the flights of big carps. Equipped with SiC double leg guides.

Feeder and coarse rods

CORMORAN GF Method Feeder

Feeder rods especially developed for method feeder fishing.

Virtually no fishing technique recently has gained as much attention as method feeder fishing. Now we have developed a feeder rod series, which covers the whole spectrum of method feeder fishing from fishing close to the shore to distance feeder fishing with large feeders.

The GF Method feeder rods are equipped with a progressive semi-parabolic action, which cares for a tight and safe fight also with strong fishes like carps or barbels. The special action reduces unhooking and enables longcasts and a safe netting. Equipped with 3 long „slow-taper“ quiver tips for optimal detection of even softest bites.

The blanks of the CORMORAN GF feeder are made of SM24 carbon fiber material, which equips the rods with great strength and high casting dynamics for long and targeted casts. Equipped with lightweight and line-protecting SiC guides and long longcast cork handle. Delivered with 3 quiver tips and cloth bag.

CORMORAN GF Feeder Pro

High-end Feeder rods

Two things are essential for a feeder rod - how long can I cast with it and how sensitive is the bite detection. The CORMORAN GF Feeder Pro is designed accordingly: its excellent casting properties reaches outstanding distances to place the rig on spots which can't be reached by many other anglers. The 3 quiver tips are perfectly adapted for the rod action and equipped with big guides. 3 highly sensitive quiver tips detect even the finest bites reliably.

Thus a piercing hook can be set, which fixes the hook even in strong currents reliably.

The CORMORAN GF Feeder Pro rods are equipped with SiC guides and a long longcast cork handle.

The blanks of the CORMORAN GF feeder are made of SM24 carbon fiber material, which equips the rods with great strength and high casting dynamics for long and targeted casts. Equipped with lightweight and line-protecting SiC guides and long longcast cork handle. Delivered with 3 quiver tips and cloth bag.

PCC
Power Carbon
Construction

CORMORAN GF Feeder Pro Quiver

The powerful GF Feeder Pro Quiver can be fished very flexible with raised as well as with lowered tip. Especially fishing with unleaded or sparsely leaded feeders in silent waters or in rivers with little current is pleasing.

Equipped with 3 quiver tips (1x carbon fiber, 2x glass fiber) and a slim cork handle.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides

CORMORAN GF Feeder Pro

Wonderful slim, powerful feeder rods, which are characterized by their light weight and lie well-balanced in the hand. The big guides and the strong backbone enable long casts, which are not natural within this price category. Equipped with 3 quiver tips (1x carbon fiber, 2x glass fiber) and a slim cork handle.

Speciland

For ambitioned specimen hunters

If you plan to acquire a new feeder, picker or carp rod, you should have a look at the new Speciland rods in any case. The price-performance-ratio is extraordinary. The lightweight, powerful SM24 carbon fiber blanks impressively show, what modern manufacturing methods and the know-how of experienced roddesigners together can accomplish. Equipped with SiC guides and high-class cork handle. The most important part of a rod remains the blank, even if much emphasis is put on the outer appearance today. But even the appearance excels the Speciland - accurate handmade design characterize this exceptional rod.

Speciland Feeder

Great feeder rods, which harmonize sensationally regarding equipment, processing, functionality and price. The lightweight and powerful SM24 carbon fiber blanks impressively shows, what modern manufacturing methods and the know-how of experienced rod-designers together can accomplish. Delivered with 3 quiver tips (2x carbon fiber, 1x glass fiber).

Bull Fighter

Feeder and picker rods for especially price-conscious coarse anglers

Let yourself be pleased by this carbon fiber series, which offers much more than you expect within this price category. Beyond the design, which would also excel many rods in higher price-categories, also the blank and the equipment convince. The development of a blank, which is slim enough, develops enough power and enables an acceptable rod weight represents a major challenge for a rod designer than designing an expensive rod, where one can choose from the whole repertoire of materials. The Bull Fighter is made for especially price-conscious coarse anglers, and fishermen who need a rod for feeder and picker fishing only occasionally. Equipped with titanium-oxide guides and cork handle. Delivered in cloth bag.

NEW Bull Fighter Picker

The Bull Fighter Picker on the one hand is strong enough for the fishing with small unleaded feeders in silent waters as well as in rivers with little current. On the other hand the rod is designed to detect even softest bites.

Equipped with 2 quiver tips, titanium-oxide guides and a slim cork handle.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
25-0030275	2.70m	5-30g	138cm	2+2	230g	9		
25-0030305	3.00m	5-30g	152cm	2+2	245g	10		

NEW Bull Fighter Feeder

With these rods, even inexperienced coarse anglers can get their feeder and hook bait to the desired spot easily. The powerful SM20C carbon fiber blanks provide the Bull Fighter feeder rods with much power for long and targeted casts. The 3 quiver tips ensure a variable bite detection, since the fish doesn't feel any resistance as at conventional float or ground fishing.

Equipped with 3 quiver tips, titanium oxide guides and long cork handle, which cares for optimal leverage for long and powerful casts.

CORMORAN APM

High-end float rods

Not only feeder fishing is gaining popularity, but also float fishing gets more and more sophisticated and is in continuous progression. Improved fishing techniques and an elaborate supply range demand rods, which are able to realize this potential.

Longer casts, more sensitive fishing and a more controlled fight with the fish are the demands.

With the CORMORAN APM rods we developed three series, which cover all areas of float fishing like coarse, zander, and fishing for trouts at ponds. Made of SM24 carbon fiber, refined with SiC guides and a superior cork handle.

Distance Match

Affordable carbon fiber match rod

CORMORAN APM 28 Vario Float

Extreme versatile float rod for casting weights of 6-28g with fast tip and a strong backbone. The slim, lightweight blank loads with much power during the cast and the fight with the fish. Targeted Fish are tenches, breams and small to medium carps. The APM 28 Vario Float can be used for fishing with natural bait for perch as well as for fishing for trouts at ponds with medium sbirrolinos and bombardas. Equipped with single leg guides for long casting distances.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
25-4028360	3.60m	6-28g	125cm	3	240g	13		
25-4028390	3.90m	6-28g	138cm	3	260g	14		

CORMORAN APM 40 Power Float

Powerful float rod for casting weights of 10-40g with fast tip and a strong backbone for fishing with wagglers and pole floats. Equipped with big single leg guides which let through line stoppers easily. For coarse fishing as well as for zander fishing or trout fishing over great distances at big ponds.

The APM 40 Power Float is wonderful lightweight and well balanced.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides

25-4040360

25-4060360

CORMORAN APM 60 Distance

Universal, powerful float rod for casting weights up to 60g with fast tip and strong backbone for fishing for big roaches and carps. The APM 60 Distance fulfils the name's promises - it's made for long casts to be successful with a float rig even over great distances. It is also perfectly suited for fishing for big trouts with big sbirrolinos.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
25-4060360	3.60m	15-60g	125cm	3	270g	13		

CORMORAN Distance Match

An excellent price-performance ratio excels this carbon fiber match rod series. Thanks to its fast action and powerful backbone, it casts even big wagglers precisely at astonishing long distances. Also superb applicable for trout fishing at ponds.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides

Black Master

For everyone, who dreams of a BLACK MASTER in the suitcase

Designing affordable quality products is very often a harder task than designing pricy products, where you can choose from the whole range of materials and components. When planning the Black Master telescopic rod series we kept by well established principles and combined them with new elements. The High Strength SM20 carbon fiber sets the basis for the low weight, the good balance and the dynamic action, which is similar to a detachable rod. The design ensures an enormous power transmission. All Black Master telescopic rods are short-sectioned for easier transportation.

All Black Master Tele are shortly divided and thus very easy to transport. They are equipped with light SiC-Tele guides, a shaped cork handle and a solid screw-winch reel seat. Delivered in a cloth bag.

Black Master Tele 30

To sum up the main features of the Black Master Tele 30: Lightweight telescopic rods with harmonic bending curve and fast action. Considering details you will find many other features, which belong to such a high-end rod. Thanks to the well-considered guide arrangement, the strains are distributed over the whole blank, which enables long casting distances and provides high strain resistance. The rod balance is optimal, the equipment remarkable.

Art-No.	length	CW	cl.lgth.	parts	wt.	guides		
28-830181	1.80m	5-30g	53cm	6	150g	5

28-830271	2.70m	5-30g	64cm	7	190g	6		
28-830301	3.00m	5-30g	65cm	8	235g	6		
28-830361	3.60m	5-30g	69cm	8	260g	7		

Black Master Tele 40

Short-sectioned telescopic rods, which cover the whole range of medium heavy fishing. Equipped with a fast and crisp action for targeted long casts.

The 2.40m and 2.70m Tele 40 versions are excellent spinning rods for pike, zander and perch, while the 3.00m long version can be considered a real all-round rod.

The 3.60m long Tele 40 is lovely for coarse fishing.

TeleCor NEW

Impressive action – like a detachable rod

If someone has to classify this rod as tele or detachable rod with blind eyes and he doesn't succeed – the development department has done a good job. These tele rods are completely new designed with respect to the guide array, which at last most importantly influences the rod action as well as its casting capabilities. If the array is not done properly, certain elements can be damaged due to stress-related overexertion.

The TeleCor are equipped with lightweight SiC tele-guides, cork handle and a solid screw-winch reel seat. The TeleCor rods are delivered in a cloth bag.

NEW TeleCor Tele Travel

Short-sectioned spinning and all-round rods with harmonic bending curve and fast action. The guide array is optimal and thus the action resembles the one of detachable rods, since the power is evenly scattered over the whole blank at the cast and fight with the fish. The rods are optimally balanced and enable fatigue-proof fishing for hours.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
26-2031190	1.95m	5-30g	62cm	5	125g	4		
26-2041210	2.10m	10-40g	62cm	5	140g	4		
26-2051240	2.40m	15-50g	67cm	6	185g	5

26-2071300	3.00m	30-70g	71cm	7	230g	6		

NEW TeleCor 40

Exceptional coarse and zander rod with fast and sensitive tip action for long and targeted casts. Especially the slim blank deserves to be mentioned, since it substantially contributes to the light weight of these rods.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
26-2040330	3.30m	10-40g	98cm	6	275g	6		
26-2040360	3.60m	10-40g	98cm	6	290g	6		
26-2040390	3.90m	10-40g	100cm	6	320g	6		

NEW TeleCor 60

Powerful tele all-round rods with strong backbone and superior casting properties. The 2.40m and 2.70m models are perfectly suited for spin fishing for zander and pike, while the two longer models are designed for ground and heavy float fishing at lakes and medium currents.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
26-2060240	2.40m	20-60g	67cm	6	165g	5

26-2060300	3.00m	20-60g	98cm	6	250g	6		
26-2060360	3.60m	20-60g	98cm	6	290g	6		

NEW TeleCor 70

This strong tele rod with powerful backbone has been especially developed for eel fishing and features an integrated starlight holder at the tip guide.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
26-2070210	2.10m	30-70g	90cm	4	170g	4		
26-2070270	2.70m	30-70g	94cm	4	220g	4		

NEW TeleCor 90

Powerful ground and predator rods with a progressive bending curve, which develops much power during the cast and also at the fight of large fishes in strong currents. The two shorter models are perfect for spin fishing for pike, while the two longer models can be considered as all-round rods for ground fishing.

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
26-2090240	2.40m	40-90g	88cm	4	205g	4

TOPFISH

TELE 40 - 3.00m

Topfish

The evolution of fiberglass!

To further maintain and expand our quality and innovation claim, we spend much effort at the development of new tackle in the premium range, but also at least to an equal part in the more economical price-range, where progress usually is much harder to achieve. The improvement of glass fiber is a hard task. We accepted the challenge and could develop „Composite Fiber“, a material with is lightweight and robust at the same time and features a higher resilience than conventional carbon fiber material. We redesigned our famous Topfish Tele series by using this innovative material, which allowed us to drastically reduce the weight of the rods by improving the robustness at the same time. The design is clear and modern, the equipment with cork handle and titanium oxide guides exemplary.

**COMPOSITE FIBRE****NEW**

Topfish Telespin 30 Perch & Trout

Short-sectioned and lightweight spinning rod for fishing for perch and trout.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
26-1030210	2.10m	10-30g	59cm	5	220g	4		
26-1030240	2.40m	10-30g	64cm	6	240g	5		

**NEW**

Topfish Tele 30 Trout

Sensitive trout rods with very fast tip action. Perfect for fishing with floats and sbirolinos.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
26-1030270	2.70m	10-30g	95cm	5	250g	5

Seacor Blue

CORMORAN **SEACOR**

Seacor Blue stands for „High Density Composite“ glass fiber rods with fast and merciless strong blanks. These rods feature enough reserves so that their limits hardly will be hit during the fight with the fish.

Seacor Blue Power Pilk

Jigging rod with fast tip action, which is beneficial at classic jigging but also when fishing with shads, since the rod enables an immediate response from the other end of the line.

Art-No.	length	CW	d. lgth.	parts	wt.	guides		
29-258215	2.10m	100-250g	110cm	2	260g	6		
29-258245	2.40m	100-250g	125cm	2	320g	6		
29-258275	2.70m	100-250g	141cm	2	425g	7		

Halibut HDC

CORMORAN **SEACOR**

If something big is lying in wait for your lure in the depth of Norway's fjords, you are perfectly armed with a Halibut HDC Interline rod.

The Halibut HDC Interline rods are uncompromisingly strong and resist powerfully, when a big sea predator tries to escape. They are made for fighting by hook or crook.

Seacor **Blue** Traveller Pilk

4-piece travel jigging rod with fast tip action, which is very pleasant at classic jigging as well as with fishing with shads, since the rod enables an immediate response from the other end of the line. Hard to believe that this rod is really divided into 4 parts.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides		
29-258216	2.10m	100-250g	62cm	4	270g	6		
29-258246	2.40m	100-250g	70cm	4	290g	6		
29-258276	2.70m	100-250g	77cm	4	310g	7		

Thanks to the long tip, which is directly mounted at the handle section, the center of strain is located very low, which allows transmitting of the whole force to the rod. Despite their pure power, these rods are extraordinary sensitive, feature a very delicate bite detection and therefore cover nearly the whole range of heavy fishing in the Norwegian fjords, regardless if you target halibut, ling, cod or wolffish. Equipped with premium screw-winch reel seat and gimbal buttcap. Delivered with cloth bag.

Art.-No.	length	CW	cl. lgth.	parts	wt.

29-1100230	2.35m	300-1000g	164cm	2	455g		

NEW Halibut HDC Traveller Interline

Based on the Halibut HDC interline rods, which have gained a remarkable reputation among Norway anglers within only one year, we designed this 4-sectioned interline travel rod, which is intended for fishing for halibut, ling, cod and wolffish. Equipped with high-end screw-winch reel seat and gimbal buttcap. Delivered with cloth bag.

Art.-No.	length	CW	cl. lgth.	parts	wt.	guides

Seacor Jig & Pilk

CORMORAN **SEACOR**

Especially developed to utilize the advantage of braided lines during sea fishing: exceptional bite detection, virtuous lure contact and a sensational feeling while fighting with the fish.

The Seacor Jig & Pilk rods are built of especially thin carbon fiber blanks and provided with an action, many anglers only dream of. Much power in the backbone and perfectly balanced. Equipped with SiC guides and high-end components.

The Seacor Jig & Pilk is equipped with a solid, robust screw-winch reel seat and strong but also lightweight SiC guides. The versions Jig Spin and Pilk Power are equipped with cork handle and metal butt cap, the traveler version with EVA handle.

Seacor Jig Spin

Superlight and modern sea rod with a very fast action and sensitive tip for the targeted fishing for coalfish and pollack with soft plastic lures and small pirks. Also very well applicable as light jigging rod.

Jig Pilk & Spin **JIG SPIN**

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
29-0123240	2.40m	30-125g	125cm	2	240g	7		
29-0123270	2.70m	30-125g	140cm	2	270g	8		

Seacor Pilk Power

Equipped with a very delicate tip, the Pilk Power sensitively detects, what your lure is doing at the other end of the line. But it also has enough backbone to control the lure and the fighting fish all over the time.

PILK POWER

Art.-No.	length	CW	d. lgth.	parts	wt.	guides		
29-0153270	2.70m	50-150g	140cm	2	270g	7		
29-0203270	2.70m	60-200g	140cm	2	315g	7		

Seacor Jig Power Traveller Pilk

If you could only take one single rod on a fishing trip to Norway, you would chose this 4-pieced travel pilk. Its light and fast and equipped with much power.

Traveller Pilk **JIG POWER**

Art-No.	length	CW	cl. lgth.	parts	wt.	guides		
29-0184240	2.40m	50-180g	66cm	4	255g	7		

Seacor Jig Power Traveller Boat

Strong, 4-piece travel boat rod with concise tip action for pirks up to 400g, which ensures an outstanding lure presentation and shows its power during the fight with big fish thanks to its harmonic bending curve. Equipped with gimbal.

Traveller Boat **JIG POWER**

Art-No.	length	CW	cl. lgth.	parts	wt.	guides

Seacor Deep Power

CORMORAN **SEACOR**

For ambitious sea anglers

The Seacor Deep Power are superlative rods for hard fishing in the fjords of Norway. These rods don't fear even biggest halibuts, lings or cod.

NEW Seacor Deep Power Traveller

Now the Seacor Deep Power is also available as travel rod; 4-sectioned and as strong as the 2-sectioned versions. The special SiC guides care for an optimal power development of the rod, an ideal line lay and a well balanced power distribution. For optimal results, this rod should be fished with a multiplier reel.

Art-No.	length	CW	cl. lgth.	parts	wt.	guides		
29-0600234	2.35m	200-600g	65cm	4	425g	10		

Seacor Deep Power

The Seacor Deep Power are superlative rods for hard fishing in the fjords of Norway. The Special-SiC-Guides ensure an optimal power transmission of the rod, an ideal line lay and a well-balanced scattering of the force. Designed for the use with multiplier reels.

Seacor Deep Power Interline

Developed for deep sea fishing with focus on lure control and perfect fighting abilities. The distinct tip action contributes to optimal bite detection, the strong tip tires also large fighters within short time. Equipped with premium screw-winch reel seat and gimbal buttcap.

Seacor Deep Power Halibutt Jig

Powerful boat rod with balanced tip action for lures up to 400g, which enables an outstanding lure presentation and can work hard during the fight with the fish thanks to the harmonic bending curve. Equipped with a high-end screw-winch reel seat and a gimbal. Can be used in combination with multiplier as well as fixed spool reels.

NEW Seacor Deep Power Interline Traveller

Now the Seacor Deep Power Interline is also available as travel rod, 4-sectioned and with the same action as the 2-sectioned version. The distinct tip action serves for an optimal bite detection, the strong backbone tires also big fighter very fast. Equipped with a premium screw-winch seat and gimbal buttcap.

Surfcast rods

Seacor Competition-Pro

Super slim – super powerful - superior casting characteristics! Made of „Super Power Japanese Carbon“, a high-modulus and highly condensed carbon fiber material. You should take a closer look at these rods in action. Maybe you won't use your old rod any longer, once you have witnessed this longcasting miracle. It takes some experience and know-how to fully load these rods - but the ones, who are capable of loading them, gain extremely long casting distances with this „longcast-rocket“. Equipped with original Fuji plate reel seat and Fuji anti-tangle K-guides, which ensure long casting distances and reduce the risk of line tanglings due to their special frame design. These guides are suited for both monofilament and braided lines.

Seacor Surfmaster

Three-sectioned very slim carbon fiber surfcasting rod with a Ultra Fast Power Blank, which is easy to handle at casting. The action is stiff but not too rigid. Thus, the Surfmaster can be fully loaded also by less experienced casters. This exceptional rod is delivered with two interchangeable tip sections, which facilitate casting and bite detection depending on the given external conditions like wind or current. The Surfmaster has been equipped with a longcast guide array and a solid ergonomically shaped reel seat.

Seacor X-Cast Surf

Three-sectioned carbon fiber surfcasting rods with built-in longcast genes at a sensational price-performance ratio. Equipped with SiC guides and a solid screw-winch reel seat. Given their casting weight of 100g-200g, these rods are also very well applicable for less experienced casters, which will face no difficulties at all when loading them.

FUJI reel seat

Corastrong 8-Braid

Round, smooth, strong - braided of Coramid

The Corastrong 8-Braid is the pro-version of our Corastrong line classic – even smoother and stronger. The 8 times braided Corastrong is not only super strong, but also enables long casting distances thanks to its smooth surface.

- Super linear strength
- Round profile thanks to 8-braid construction
- Very smooth surface for extraordinary casting distances
- Low stretching - in comparison with monofilaments
- Outstanding abrasion resistance
- UV resistant - no sun aging
- Absorbs almost no water
- Extremely long lifetime

A very important parameter for the quality of a braided line is the „Pic Count“. It tells you how many times the fiber is braided over a certain length. The higher the „Pic Count“, the tighter the fibers are braided and the smoother the surface. The line body is getting a unity more and more depending on the tightness of the braiding of the fibers. But also the production costs rise strongly. But not at the Corastrong 8-Braid – a special braiding procedure enables the production of a round, smooth line at a sensational prize.

Corastrong 8-Braid Super Fast Sinking

Super fast sinking

Thanks to its special weight, the Corastrong 8-Braid Super Fast Sinking is sinking very fast and lying down smoothly at the bottom. Thus it is perfectly matching for feeder and match fishing, for common ground fishing and especially for carp fishing. Here it is a special advantage if the line adapts to the structure of the bottom to prevent the frightening of suspicious big carps. The dark brown color is of additional support. For ground and feeder fishing also the braided line's abrasion resistance is of crucial importance. Only a tight braiding with a high „Pic Count“ and a special surface coating ensure that a braided line can resist against mussel banks and sharp-edged underwater barriers like stones, roots etc. The Corastrong 8-Braid Super Fast Sinking is exemplary regarding these features. Color: dark brown

- Super fast sinking
- High linear strength
- Round profile thanks to 8-braid
- Smooth surface for extraordinary casting distances
- Negligible stretch – no comparison to mono lines
- Extremely low abrasion - ideal for waters with barriers
- UV-proof – even intense sun exposure can't damage it
- Non-absorbing for water
- Extremely long lifespan

Corastrong Feeder Braid Super Fast Sinking

Super fast sinking

Completely new developed fast sinking PE feeder line. It is roundly braided and thus cares for a perfect line lay as well as for less friction during the cast. Beyond its fast sinking properties, especially its abrasion resistance and its linear strength stick out. Thanks to the nearly non-existing stretch, the bite detection is incredibly sensitive and direct contact to the fish is ensured during the whole fight. Many feeder anglers, which are using braided lines, apply a piece of monofilament line as shock absorber between rig and braided main line.

- Fast sinking
- High linear strength
- Round profile
- Smooth surface for extraordinary casting distances
- Negligible stretch – no comparison to mono lines
- Extremely low abrasion - ideal for waters with barriers
- UV-proof – even intense sun exposure can't damage it
- Non-absorbing for water
- Extremely long lifespan

Cortest

The new Cortest lines are highly specialized polyamide lines for particular fields of application. Such special characteristics can be achieved by targeted adjusting of the polymerization process to yield the desired special properties. In addition, the lines are specifically processed after the polymerization, as e.g. by coating them with silicone or another water-Repellent system. At these lines the latest production techniques and materials have been used to achieve best possible results.

Cortest Fluo

The perfect monofilament line for predator hunters, which want to trace their line also under diffuse light conditions. The fluo-yellow color enables easy tracing of the line above the water surface. Thanks to the special „Water Repellent“ system the Cortest Fluo absorbs considerably less water than usual monofilament lines and therefore maintains its high wet knot strength for a long time. An additional big advantage of the Cortest Fluo is its high abrasion resistance, which is especially useful at waters with many underwater obstacles, since this avoids line damages that often lead to losses. Given these superior properties, the Cortest Fluo is a wonderful line, which is, among other fields of application, especially useful for zander fishing.

Cortest Trout & Perch

This very supple line has been especially developed for spin fishing for perch and trout with small lures like mini plugs, spinners, small spoons and jigs. The Cortest Trout & Perch absorbs hardly any water thanks to the „Water Repellent“ system and thus reaches very high wet knot strengths. The Cortest Trout & Perch additionally features a very high abrasion resistance, which is especially useful at waters with many underwater obstacles to avoid losses. The evenly scattered elasticity factor makes it possible, to fight also large and strong fishes with small line diameters.

Cortest Match & Bream

Sinking

Fast sinking special line for match and float fishing. The Cortest Match & Bream is made of a special polymer with medium stretch factor and built-in „Less Memory“ effect. Like this, big breams and coarse fish easily can be tired also when using small line diameters. The high abrasion resistance enables the shifting of split shots without damaging the line and protects you at fishing in waters with many underwater obstacles. The silicone coating effects a silky-smooth surface, which allows long casts, since the Match & Bream easily glides also through very small guides. This line can be knotted very conveniently and is furthermore excelled by a very high wet knot strength.

Cortest-MP Monofilament

The Cortest all-round line for universal use – it doesn't matter if you use it as spinning line, for ground fishing, for fishing with floats or even for special fishing techniques as carp fishing, feeder fishing etc. Made of low-stretch polymer and coated with silicone, the Cortest MP is characterized by its sleekness, its extraordinary long casting qualities and its superior knot strength.

Cortest Feeder Mono Sinking

Fast sinking feeder monofilament line. Next to its fast sinking behavior, especially its low-stretching property is prominent, which offers crucial advantages during fishing over great distances. The indication of bites is getting more sensitive and you can keep straight contact with the fish during the fight without the threat of losses next to the landing net as it often happens with braided lines. Made of an especially resistant polymer, which gains an extremely smooth surface for little abrasion resistance during the cast thanks to a special fluorocarbon coating.

Cortest Jig & Lure

Especially developed for spin fishing with smaller soft plastic lures like mini plugs, spinners, small spoons and jigs. The big advantage of the Cortest Jig & Lure is its high abrasion resistance, which is especially necessary in waters with barriers to prevent line damages and thus line rupture. The Cortest Jig & Lure absorbs only very little water thanks to its „Water Repellent System“ and thus reaches a high wet knot strength.

PRO CARP Carp lines

PRO CARP

Pro Carp Black

- ▶ High abrasion resistance
- ▶ Superior knot strength
- ▶ Robust and sturdy
- ▶ Little stretch
- ▶ High suppleness
- ▶ Superior casting characteristics
- ▶ Consistant calibrated

1200m

Art-No.	ø	strength		capacity
		kg	lb	
36-412125	0.25	6.1	13.7	1200 m
36-412128	0.28	7.1	16.0	1200 m
36-412131	0.31	8.2	18.5	1200 m
36-412133	0.33	9.2	20.7	1200 m
36-412136	0.36	10.5	23.6	1200 m

The Pro Carp Black fulfills every expectation, which Carp Pros can have regarding a premium carp line. The highlights of this line are the high linear breaking strength, the high knot strength and first of all the low stretch combined with the extraordinary high abrasion resistance. Thanks to the special design the Pro Carp Black smoothly exits the spool and therefore enables long casting distances. When fishing for big carps, which challenge everything, the Pro Carp Black is the proper choice.

PRO CARP

Pro Carp Clear

Sinking

- ▶ Sinking
- ▶ High abrasion resistance
- ▶ Superior knot strength
- ▶ Transparent and hardly visible
- ▶ Robust and sturdy
- ▶ Little stretch
- ▶ High suppleness
- ▶ Superior casting characteristics
- ▶ Consistent calibrated

1200m

Art.-No.	ø	strength		capacity	
		kg	lb		
36-512125	0.25	5.6	12.6	1200 m

36-512136	0.36	9.9	22.3	1200 m	

With the sinking Pro Carp Clear you can apply a silicone-coated carp line, which is sinking down to the floor fastly. Thanks to the silicone coating this line offers excellent casting characteristics and is very robust and wear-resistant. First of all in waters with many underwater barriers, the Pro Carp Clear is doing an excellent job due to its high abrasion resistance.

PRO CARP

Pro Carp XR

- ▶ Very soft and supple
- ▶ High abrasion resistance
- ▶ Superior knot strength
- ▶ Robust and sturdy
- ▶ Little stretch
- ▶ Superior casting characteristics
- ▶ Consistent calibrated

1200m

Art.-No.	ø	strength		capacity	
		kg	lb

Line Boy

A great help for filling the reel with new line. The suction knob of the line spooler can be fixed to the car or any other smooth surface and the spring applies pressure on the line spool. Many anglers have waited for this help.

Art.-No.

85-50500

Seacor Special Lines

Saltwater leader material

Especially developed nylon material for the rigging of sea leaders for big fish like halibut, ling or cod. It is extremely soft and thus can be straightened and knotted easily. Above all it is extraordinary abrasion resistant - this makes you feel safe during the fight with big sea fishes.

Bullet AT

No matter where you fish, you will experience something completely new with the Bullet AT spinners: much less line twist. The Anti-Twist Head makes it possible. It reduces line twisting considerably and thanks to its huge 3D-eyes has a great appeal to any kind of predators. Equipped with a robust axis and very smooth running spinner blades. With very sharp, roundly bent trebles and premium components.

Bullet Spinnerfish

This lure catches! The Bullet Spinnerfish is a combination of softplastic lure and spinner. The spinner generates strong blast waves and reflects under water at constant retrieving. You can fish the Spinnerfish like a classical softplastic lure and let it sink down with tensed line. The spinner blade rotates even in this situation and thus provokes bites right next to the bottom. The Bullet Spinnerfish will provoke more attacks, if it is fished with alternating ways of presentation.

Spoons

Centercast

The new Generation of

CORA Z

CenterCast, the new generation of the Cora-Z spoons, is a logical further development of spoons, which – until now – were simply cut out of metal sheets and finally shaped afterwards. The new CenterCast method is based on the use of different diameters to place the center of gravity in a way that enables longer, targeted casts and a perfectly dwindling action.

Art-No.	length	wt.

50-57...45	8.0 cm	45.0 g

REALFISH DESIGN 50-5706... , 50-5709...

Art-No.	length	wt.
50-570606	3.2 cm	6.0 g
50-570616	4.5 cm	16.0 g
50-570625	6.0 cm	25.0 g
50-570635	7.0 cm	35.0 g
50-570645	8.0 cm	45.0 g

NEW

Common spoons are cut out of metal sheets and brought into final shape afterwards. The diameter is equal over the whole spoon. The new CenterCast method is based on the use of different diameters to place the center of gravity in a way that enables longer, targeted casts and a perfectly dwindling action.

Thanks to the injection molding process the center of gravity can be placed in a way to enable optimal action and casting properties.

The Cora-Z CenterCast can be cast over greater distances than usual, cut-out Cora-Z spoons and enters the water surface more smoothly and, thus, scares shy and careful predators less.

Perch jigs

Baby Mania

The Baby Mania guarantees excellent casting properties to fish right there, where predators hunt at the surface. The spinner blade generates strong blasts.

Real Jiggy

Rod-shaped, compact balance jig, which is very well suitable for vertical fishing as well as for fishing from sheet pilings or the jetty. Sinks fast and can be cast very long. Thanks to the special Soft-Lead material the Real Jiggy can be bent to an S-shape and thus is very catchy as spinning lure for trout and perch.

Wide Nose

This lipless spintail plug, which moves through the water via zigzag movements generates blasts and crackles, which can be received by pikes, zanders or perches via their lateral organ over great distances. The spinner's tail twists similar to usual spinners, generates reflexions and blasts and attracts the attention of lazy predators. You even can feel the vibrations in your rod's handle. You really need to use the WIDE NOSE in overfished waters to be successful. Fish the Wide Nose variably - short stop and go, twitching and constant retrieving lead to success. You will be amazed – it's also catchy when used at trolling. Equipped with super sharp Round Bend CGS trebles made by VMC. Body length: 60mm sinking

Spintail-Concept

The spinner blade generates reflections and blasts, which attract the attention of predators over great distances and entices them.

Mania-M shad

This innovative spintail shad lure produces blasts, which can be noticed via the lateral line of pikes, zanders or perches – even over great distances. The spinner's tail turns similar to a common spinner, produces reflections and blast and thus gets the attention of lazy predators. You will feel the vibrations even within the rod's handle. The Mania is especially catchy in overfished waters. Fish the Mania in various ways - you can retrieve it constantly or with short stop&go intervals or you fish it classically like a shad: sinking to the bottom with a tight line, rising a little and let it go down again.

The spinner's blade rotates even during the sinking and animates even lazy predators. Equipped with single hook and a super-sharp Round Bend CGS treble made by VMC.

Minijigs

Micro Fry

NEW

READY TO FISH

The Micro Fry imitates a small prey fish, which perfectly fits into the favored predator-prey system of perch and trout. Nearly no predator can withstand the strongly wobbling movement during the retrieving and sinking. Twitch the Micro Fry with interruptions at tensed line – it will perfectly evolve its inherent action with an ultra-light spinning rod or a jiggerspin rod. Rigged with slim jighooks with chemically sharpened hook tip.

Content: 4 pieces

Set 1: transparent blue, nature, purple and brown

Art.-No.	length	wt.
50-50041	8.5 cm	3.5 g

Set 2: black/gold, perch, red/silver and yellow-green

Art.-No.	length	wt.
50-50042	8.5 cm	3.5 g

NEW

READY TO FISH

READY TO FISH

Micro Honk

One of the most catchy mini jigs for trouts and perches we know. Nearly no predator can withstand its swaying movements during retrieving and sinking down. The Micro Honk should be fished with the classical Up & Down method on taut line. Fished with an ultra-light spinning rod or a jiggerspin rod it perfectly develops its integrated action. Rigged on a premium jig hook with chemically sharpened tip. Content: 4 pieces

Set 1 - dull colors
pale purple, pearl, ayu, water melon

Art.-No.	length	wt.
50-50011	6.3 cm	2.8 g

Set 2 - bright colors
yellow, pink, green, red

Art.-No.	length	wt.
50-50012	6.3 cm	2.8 g

Micro Dancer

The Micro Dancer is built to freeze in its angle of contingency when reaching the bottom for some moments until it smoothly „tumbles over“. This is totally deadly for trouts and perches, who usually attack, when the Micro Dancer is still standing. Like this you can methodically scan even tiniest spots. Fished with an ultra-light spinning rod or a jiggerspin rod it perfectly develops its integrated action. Rigged on a premium jig hook with chemically sharpened tip. Content: 4 pieces

Set 1 - dull colors
pale purple, pearl, ayu, water melon

Art.-No.	length	wt.
50-50021	6.5 cm	3.8 g

Set 2 - bright colors
yellow, pink, green, red

Art.-No.	length	wt.
50-50022	6.5 cm	3.8 g

Jiggy

The CORMORAN Jiggy Minijigs not only catch trouts but also perches, chubs etc. Fished with an ultra-light spinning rod or a jiggerspin rod, they can be cast very long, despite their light weight, and can be presented temptingly. Especially big, cautious predators fall for the Jiggy. A little bit of twitching during retrieving will lead to success.

The following method is remarkably recommendable: Put out your forefinger of your right hand so that the line will bang against your finger during retrieving and thus will let the jig „bounce“. The Jiggy is also extraordinarily catchy at vertical fishing. Rigged on a premium jig hook with chemically sharpened tip.

Mini-Softlures

Drop Shot Fry

The 3D – Drop Shot Fry imitates a small prey fish, which perfectly fits into the favored predator-prey system of perch and zander.

The inherent 3D foil reflects the light and thus makes the Drop Shot Fry look like a real fish.

Content: 4 pieces in different colors

Length: 10.0cm

Art.-No.	length	
50-50052	10.0 cm	

Drop Shot Vertical System

The Drop Shot Vertical System has been developed for easy rigging and a perfect 90° angle of the lure under water. Not difficult knots are necessary.

Simply fix the main line at the upper eyelet, mount the Dropshot lead to the lower part of the leader and your rig is ready to fish. Due to the additional lever of the prefixed eyelet, also little movements of the rods tip have a positive influence on the lure. Like this the Drop Shot Vertical System enables completely new lure presentation.

The Vertical System is available in 2 sizes and thus covers a broad range of lure variations.

CORMORAN 3D-Softfrog

NEW

Temptingly real!

The shape of the CORMORAN Softfrog has been designed via a 3D sculpting process and thus looks exactly as its natural paragon. The Softfrog is a softplastic lure, which can be presented with jighead as well as with preloaded offset hook.

The difference to most of the other frog imitations is, that the CORMORAN Softfrog hasn't been developed only for surface fishing but can also be presented – thanks to light leads – below the surface as well as in deeper water layers. It's a real pike and bass guarantor when fished with little jerking movements over weedy areas – especially in highly frequented waters.

**K-DON****K-DON S11 Jumper**

The Jumper is another model of the K-DON plastic lures series. The special construction with the indentation in the middle of the body enables the Jumper to run very active, even with lightweight jigheads, and the soaking of the lure is also much easier for the predator if the lure folds in the middle.

The fins at the end of the lure produce further blasts and stimulation and activate even laziest predators to attack. There are small gaps at the belly and the back for mounting Off-Set hooks. The Jumper is an absolute realistic plastic lure which has been developed for currents as well as silent waters.

Jigheads

NEW

Jighead round

The perfect jighead for softplastic lures. The hook is made of High Carbon steel and is excelled by its wide curve as well as by its impressing stability. It resists also large predators. The extremely strong and chemically sharpened hook tip cares for a safe hooking also over long distances. Especially when using light tackle, a fast penetration is of special advantage. The smooth surface with special black nickel coating is an additional highlight, which provides further stability to this hook.

TEAM CORMORAN PLUGS

REALFISH DESIGN

Copied from nature. Due to a new printing method, we succeeded in applying very realistic fish designs on our CORMORAN plugs, which are thus extraordinarily catchy in combination with their realistic actions.

Beyond the 100% REALFISH Designs we also developed some fish designs, which orientate towards real fish but feature a special appeal due slight modifications.

Saibling

Silver Perch

Dying Roach

Bloody Silver Perch

Fire Perch

Carp

Perfectly imitates a small carp or a crucian carp and is successful at every type of water.

Natural Perch

More realism isn't possible. In combination with a Team CORMORAN plug action a deadly lure.

Chub

A perfect copy of a small chub. Catchy in silent as well as in running waters.

Gudgeon

Nearly indistinguishable from a real gudgeon. A great color for all predators and all kind of waters.

Bleak

This color is part of the preferred predator-prey system of pike, zander and perch. Catchy anywhere and anytime.

Baby Brown Trout

Even in waters without brown trouts this color is a real „chart-buster“.

Rainbow Trout

You will find many color variants at rainbow trouts, but this is the most typical one and very catchy.

Roach

A perfect imitation of a roach or common rudd. Catchy anywhere and anytimes.

Belly Diver Mini

The small and compact Belly Diver Mini quickly gains depth, where it seduces perches, zanders and pikes. The large diving lip equips this lure with a very active swimming motion, which provokes strong vibrations even at low speed. Perfect for fishing from the boat, because it keeps its diving depth also near the boat. Produces a strong blast wave, which activates also dull predators. Perfect for big trouts, which lurk in great depths.

Length / Weight: 38mm / 3.0g
Retrieve stop: slow rising
Diving depth: up to 2.0m
Jerkbaiting: no
Twitching: yes
Trolling: yes, diving depth up to 3.0m

Shallow Baby Shad Reloaded

Perfect trout and perch plug with realistic body imitation of several prey fishes. For silent waters, currents and for trolling for trouts. Smooth retrieving, differing speed or twitching in alternating intervals – the Shallow Baby Shad reloaded fits all. Fishing with ultra-light equipment, there is nothing better than tricking a strong trout with such a small plug.

Length / Weight: 40mm / 2.5g
Slow sinking
Retrieve stop: slow rising
Diving depth: up to 0.5m

Iwashi Mini

Small plug with classical minnow shape for the upper water layers. The Iwashi Mini is a real all-rounder, primarily catches perch, trout, chub and can be fished in silent waters as well as in currents. The body shape produces flanking movements and thus provokes strong vibrations. Suitable for all modern fishing techniques as well as for trolling with light equipment

Shallow Iwashi

Thanks to the special shape with the flattened sides, the Shallow Iwashi is a strongly flanking plug, which provokes attacks of dull and lazy predators during jerkbaiting or twitching. It also perfectly imitates a small, active prey fish during simple retrieving. Catchy for trout, perch and chub and also for pike and zander during the hot season, when they hunt small prey fishes next to the surface.

Bass Diver

Very agile and compact plug, which can be cast very long and targeted - even at strong headwind. Gains depth very fast and transmits strong vibrations even at slow retrieving. Catches predominantly perches and trouts, but also convinces zander and pike. At retrieve stops, the Bass Diver immediately starts to rise up to the surface. Like this, you can scan all water layers up to 3.5m systematically.

The Bass Diver belongs to the „silent“ category and does not produce any rattle sound.

Length / Weight: 55mm / 9.0g
Floating
Retrieve stop: slow rising
Diving depth up to 3.5m

Belly Diver N

The Belly Diver N enters the hunting-ground of zanders and pikes. The large diving lip supplies this plug with a very active swimming motion. Perfect for fishing from the boat, because it keeps its diving depth also near the boat. Produces a strong blast wave, which activates also lazy predators. The Belly Diver N belongs to the „silent“ category and does not produce any rattle sound.

Length / Weight: 72mm / 15.0g

Belly Dog N

We further developed and modified one of the catchiest crankbaits for pike and zander. The round body of the Belly Dog N can't be overseen by any predator, since it produces enormous turbulences, which attract even lazy pikes. At stops, the Belly Dog N slowly rises to the surface thanks to its exactly dosed buoyancy. Thanks to its compact shape, this lure can be cast very long and targeted. The perfect choice for targeted fishing among water plants and underwater barriers.

Length / Weight: 68mm / 24.0g

Floating
Retrieve stop: slow rising
Diving depth: up to 1.5m

Minnow N35

The Minnow N35 represents a top-plug for perch and zander, but is also very well applicable at fishing for pike during the summertime. Thanks to the longcast-system, this classic minnow can be cast very long and targeted. The action is comparatively smooth, which is especially successful during the feeding period. Can be applied in silent waters and rivers. Field of application: perfect for spin fishing and trolling. A spinning rod with a fast or medium-fast action and a casting weight about 3-20g perfectly matches with this lure. For twitching and jerkbaiting, the rod should not exceed 2.10m.

Length / Weight: 85mm / 7.0g
 Floating
 Retrieve stop: slow rising
 Diving depth: up to 1.5m
 Jerkbaiting: yes
 Twitching: yes
 Trolling: yes, diving depth up to 1.9m

X-Deep Shad

The special weight distribution supplies the X-Deep Shad with excellent swimming characteristics and enables extremely long casts. The long diving lip cares for instant diving action – the perfect plug for fishing for zander at break-off edges! During trolling it can even reach diving depths of up to 6m if presented on a thin braided line. Perfect plug for variable twitching, which forces the X-Deep shad to strong lateral escapes.

Length / Weight: 87mm / 18.0g
 Swimming
 Retrieve stop: slow rising
 Diving depth: 3-6m

The TEAM CORMORAN ME-RA plugs are the further developed ME-RA-"S" plugs, whose balance and action could further be improved. They are multi-piece swimbaits without diving lip and feature an almost nature-like design. Let the ME-RA sink to the desired depth after the cast - during retrieve it gets up gradually. In this way you scan several depth ranges. If a defined depth range is targeted, just stop the ME-RA for repeated moments during retrieving - thanks to the low center of gravity they are perfectly balanced and dwindle down again very slowly. At constant retrieve they swim irresistible like real prey fish with natural moves. At twitching and jerkbaiting they show their versatility: They burst in a controlled way and provoke many predators to savage attacks.

REALFISH DESIGN

Copied from nature. Due to a new printing method, we succeeded in applying very realistic fish designs on our CORMORAN plugs, which are thus extraordinarily catchy in combination with their realistic actions.

Swimbaits sinking

ME-RA Perch

The natural zigzag movements and the nearly natural imitation of a perch make the ME-RA Perch a real highlight especially in frequently fished waters, first of all for pike and zander. Occasional impulses with the rod bring variety into the action of the ME-RA Perch and therefore increase its attractiveness for lazy predators.

ME-RA Shad

The key for the incredible catchiness of the ME-RA Shad, which perfectly imitates a prey fish, is its exemplary balance, which enables you to control the movements in a very versatile way - simple retrieving is often enough to provoke a predator. You can get the best from this lure by fishing it versatile with a very active rod - a real winner lure.

ME-RA Roach

Another highlight of our swimbait program is the three-part ME-RA Roach, a slim fish imitation with seductive movements, which can show many different actions when led variably. Especially when retrieving slowly (really: the slower the better on many days) with short jerks and longer retrieve stops with taut line, the ME-RA Roach is a predator-killer.

Big Trout Supplies

Trota Hölzl

The Trota Hölzl has been developed for slow retrieve near the bottom. Thanks to the high buoyancy the Trota Hölzl is standing upright and goes up at the slightest pull. Important: Always keep the line under tension – especially during the sinking phase. Normally trouts attack during the retrieve, but attacks during the fall are possible as well. The perfect trout rod features a sensitive tip, which is kept parallel to the bank in order to detect even softest bites. Once the bait is attacked, turn the rod in fish-direction and open the bail or better: use a small free spool reel. Wait with the hooking until the fish pulls line off.

Rigging: Big Trout Trota Hölzl, Sbirolino-stopper and Big Trout triple swivel.

Leader: 120cm with split shot ca. 30-50cm in front of the bait. Floating baits are perfect.

Art-No.	wt.	
79-64110	10.0g	
79-64120	20.0g	

Content: 1 pc.

Sbirolino Stopper

Made of soft material, which fixes the stopper slip-free on the line. Available in transparent and milky-white. Designed for knot protection and precise array of rig components, like Vetrinis. Going trout fishing without Sbirolino-stopper - unthinkable for serious trout specialists.

transparent

79-50204	4mm	10pc	
79-50206	6mm	10pc	
79-50208	8mm	10pc	

Trout Floater

The Trout Floaters are rigged like silicone stoppers and remain fixed on the line thanks to their integrated rubberized line tubing. Applicable as bite indicators and floaters. Use yellow or red, depending on the light conditions. At surface fishing with the milky-white Sbirolino, the white Trout Floater should be used. Available in round and oval shape

Trout Triple Swivel

Line twist is a tiresome topic at trout fishing, which can't be avoided totally. When fishing without swivel, you almost can see, how the line twists more and more until casting is nearly impossible. Line twist cannot be prevented entirely, but one can minimize its disturbing influence to a minimum. The crucial role plays the swivel. We produce our BIG TROUT triple swivels (available with or without snap) on the latest machines with extreme low tolerances to provide a smooth running rotation. The 3 sizes cover all sorts of trout fishing techniques.

Strength
Size 7 - 16kg
Size 8 - 11kg
Size 10 - 7kg

Trota Floats

Trota-S1 Distance Float

Preloaded super longcast inline trout float for fishing over long distances. Thanks to the perfectly centered weight this float can be cast long and precisely. The depth is adjusted by a sbirilino stopper, which is mounted to the main line above the float. Leader length 2-3m, \varnothing 0.16mm to \varnothing 0.20mm.

Art.-No.	strength g
79-60510	10+2
79-60515	15+2

Trota-S2 Distance Float

Preloaded longcast trout float for medium to long distances. The depth is adjusted by a sbirilino stopper, which is mounted to the main line above the float. Thanks to the perfectly centered weight this float can be cast long and precisely. Leader length 2-3m, \varnothing 0.16mm to \varnothing 0.20mm.

Art.-No.	strength g
79-60606	6+2
79-60608	8+2
79-60610	10+2

Trota-FS1 Trout Float

Tremarella inline trout float. Produces strong vibrations thanks to the bellied shape, which attract trouts. Perfect for fishing near the surface.

Art.-No.	strength g
79-60412	2.0
79-60413	3.0
79-60414	4.0
79-60415	5.0
79-60416	6.0

Trota-FS2 Trout Float

Classic inline trout float. The line exits the float laterally in the lower part. Perfectly suited for fishing in greater depth, perfect for up to 2.50m.

Art.-No.	strength g
79-60422	2.0
79-60423	3.0
79-60424	4.0

Big Trout Baits

Especially developed for fishing for trouts. Made of a floating super-stretch soft plastic, which enables these unique properties and actions of the Big Trout lures. They are very active, act on finest variation of your lure presentation, generate intensive blasts which tempt trouts and convince by their long lifetime and robustness. They are delivered per 8 pieces in a resealable plastic bag and are flavored with anise flavor.

Big Trout Jigtail

In contrast to many other jigtails, the Big Trout Jigtail generates a high-efficient, spiral blast thanks to its broad and short tail. The trout feels these vibrations and smells the anise-flavor of the Jigtail. The jigtails are delivered per 8 pieces in a resealable plastic bag.

Art-No.	length	cont.	
79-8006...	3.8cm	8 pc	

Big Trout Tailwalker

The Tailwalker is a perfectly shaped rotating lure which rotates around its own axis during retrieving and thus produces intensive blasts. Thanks to a bait needle, this lure is also easy to mount for less experienced trout anglers. The Tailwalkers are delivered per 8 pieces in a resealable plastic bag and are flavored with anise flavor.

Big Trout Taildancer

The Taildancer is a preformed trout lure, which is rotating around its own axis during retrieving and generates extraordinary intensive blasts thanks to its rotation plate – thus also lazy trouts will be enticed. A great trout lure, which won't be missing in any lure box. The Taildancers are delivered per 8 pieces in a resealable plastic bag and are flavored with anise-flavor.

Feeder fishing

Cage Feeder Support

The feeder claw is charged with a lead to stay in the same place in running waters. It can be fixed with 2 rubber stoppers at the sides. If you fix the bar at the bottom, the feeder can be filled in as usually.

Art-No.	cont.	
49-06204	4pc	

Feeder Power Gum

Power gum for feeder fishing - ideal for diverse feeder montages as shock absorber. 5m on a practical dispenser spool.

Art-No.	Ø	
49-51015	1.2mm	

Feeder Rig

Braided professional feeder lead with Power Gum Shock absorber (ca. 15cm - stretches up to 50cm).

Art-No.		
49-50001		

Feeder Rig

Classic monofile feeder lead with line maintaining pearl swivel to fix to the feeder.

Art-No.		
49-50002		

Feeder Rig „Twisted Line“

Easy to rig but extremely clever to handle. The rolled up line prevents the leader and the feeder from tilting over but is also nearly invisible at the ground.

Art-No.	Ø	
49-50005	0.3 mm	

Feeder Rig „Freerunner“

The feeder's swivel can run freely up and down the line to give the bait more play until it is sucked in by a suspicious fish. Thus we recommend to use this leader when fish are cautious. The second line directly sends the signal of the bite to the rod's tip before the fish realizes the resistance of the feeder.

Art-No.	Ø	
49-50006	0.3 mm	

Feeder Rig „Stopper“

Due to the 2 rigged stoppers, the angler can adjust the resistance of the feeder by his own. If the fish are suspicious, the space between both stoppers should be enlarged.

Art-No.	Ø	
49-50007	0.3 mm	

Feeder Rig „Method Rig“

The Feeder Method Rig is adopted from carp fishing and only the size is adapted for feeder fishing. The two-colored line is hardly visible at gravelly and sandy ground. Due to the loop at the end of the leader it can be combined with nearly every kind of rig.

Art-No.	lbs-Hook	cont.	
49-50003	25-8	3	
49-50004	15-10	3	

Booms

Still one of the most used accessories for carp and feeder fishing. Of course these booms are also applicable for normal ground fishing

Anti-Tangle Boom, curved

Made of plastic, with swivel.

Art.-No.	length	cont.	
48-51110	10.0cm	3 pc	
48-51112	12.0cm	3 pc	

Flexi Feeder Boom - flexible and curved

Flexible, curved Anti-Tangle Boom with swivel, which is rigged rotatable in all directions.

Art.-No.	length	cont.	
49-52013	13.0cm	2 pc	

Flexi Feeder Boom - flexible and straight

Flexible, straight Anti-Tangle Boom with swivel, which is rigged rotatable in all directions.

Art.-No.	length	cont.	
49-52112	12.0cm	2 pc	

Power Feeder Boom - straight

Anti-Tangle Boom with swivel. Rotatable in all directions.

Art.-No.	length	cont.	
49-52212	12.0cm	2 pc	

Anti Tangle Boom - curved

Curved Anti-Tangle Boom with swivel.

Art.-No.	length	cont.	
49-52312	12.0cm	3 pc	

Metal Anti-Tangle Boom - curved

Strong, curved Anti-Tangle Boom with swivel.

Art.-No.	length	cont.	
49-52412	12.0cm	3 pc	

Anti-Tangle Boom - straight

Universal, straight Anti-Tangle Boom for ground, feeder and carp fishing. With line-protecting butt caps. Color: black

Art.-No.	length	cont.	
49-53005	5.0cm	3 pc	
49-53010	10.0cm	3 pc	
49-53015	15.0cm	3 pc	

Anti-Tangle Boom - curved

Universal, curved Anti-Tangle Boom for ground, feeder and carp fishing. With line-protecting butt caps. Color: black

Art.-No.	length	cont.	
49-53105	5.0cm	3 pc	
49-53110	10.0cm	3 pc	
49-53115	15.0cm	3 pc	
49-53125	25.0cm	3 pc	

Weighted Anti-Tangle Boom - straight

Due to the additional weight, the boom's buoyancy is reduced and thus it lies right next to the ground. Especially suited for waters with shy fish. Color: black

Art.-No.	length	cont.	
49-53220	20.0cm	3 pc	
49-53230	30.0cm	3 pc

43-30504	4.0	
43-30506	6.0	
43-30509	9.0	
43-30512	12.0	

Zander floats

Due to the frequent use of artificial lures many zander anglers forget a real alternative: the dead bait fish. Especially fishing with the zander float can be very successful - if using the right technique. The active presentation of a small, dead batfish by float is a remarkably successful technique. Jouke Jansma developed two of such zander floats in corporation with CORMORAN, which enable presenting a dead bait fish very tempting. With some exercise, every zander angler can apply this technique successfully. Furthermore it's possible to make use of this kind of fishing for zander from the boat as well as from the bank - both works.

Art-No.	length cm	strength g	
42-06005	31.0	5.0	

Art-No.	length cm	strength g

Magmix Roach - 1kg

Art.-No.	description
59-60001	roach

Magmix Bream - 1kg

Art.-No.	description
59-60002	bream special

Preparation:

Mix the feed in short terms, 3-4 times within 15-20 minutes, with small amounts of water and let it soak. Then push it through a sieve. Adding maggots, casters and worms makes it even more catchy. Keep in a cool and dry place! Minimum durability: 12 month

Magmix Maize Pellets

Magmix Corn - 1kg

Corn pellets made of sweet, roasted corn can be fed with a catapult or by hand around the hook bait. These pellets dissolve in water very quickly and transmit the very attractive scent of roasted corn directly to the water. Thereby the pellets resolve into smallest particles, that can not satiate the attracted fish. Content/bag: 1kg

Art.-No.	col.
59-30100	yellow

Oil, grease and varnish

Oil, grease and varnish

Rod varnish

fast drying

Lacquer for rods to correct damages and scratches.

Art-No.	cont.	
49-70014	20ml	

Reel Oil

Fine reel grease for fixed and multiplier reels in practical plastic bottle with sharp lock.

Art-No.	cont.	
49-70011	20ml	

Reel Grease

Grease for ball bearings of fixed and multiplier reels. Saltwater resistant, to avoid corrosion and abrasion.

Art-No.	cont.	
49-70010	15.0g	

Silicone Spray

Super quality spray with high silicone contingent. Makes fly's durable and swimable.

Art-No.	cont.	
49-70005	50ml	

Duck Tail Grease

Grease for artificial fly's - outstanding float ability..

Art-No.	cont.	
49-70003	8.0g	

Silicone Grease with high silicone amount

First class silicone grease with felt wiper for fly's and lines, water-repellent and neutral in taste.

Art-No.	cont.

Bite Indicators

Pro Carp F-6000 Wireless Bite Indicator Complete Set

Competence, know-how and a perfect design are the characteristics of this wireless bite indicator, which is programmed by buttons. With completely sealed electronic components, making the bite indicator totally waterproof.

Technological features

Bite indicator

- Integrated wireless transmitter
- Sensitivity control
- On/Off button
- Adjustable volume. The volume can be reduced to zero
- Adjustable tone pitch
- LED-light as bite interval indicator/afterglow
- Connection for 2x AAA-1.5V batteries

Receiver

- Displays up to 4 indicators
- On/Off button
- Adjustable volume
- Adjustable tone pitch
- Separated battery compartment
- With hip clip
- Connection for 2x AAA-1.5V batteries

Pro Carp F-6000 complete set
3 bite indicators and 1 receiver
with matching base are delivered
in practical suitcase (batteries
not included).

Pro Carp Pods & Supplies

Pro Carp Black Pod

Super lightweight, extremely strong and quick to assemble.
An high-end pod.

Made of super lightweight aluminum.

Innovative premium "De Luxe" rodpod for 3 rods, made of super lightweight aluminum. The rigging up and the adjusting to the given conditions is very fast and easy.

Equipment: 2 non-adjustable buzzerbars with a width of 30cm and 34cm for 3 rods.
4 banksticks à 25cm

Art-No.

11-10200

Pro Carp Gunpod

The Pro Carp Gunpod is designed for the use of up to 3 rods. The telescopic legs provide a safe base also on uneven ground. Thanks to the centered screw, the pod is installed extremely fast and the propensity can be adjusted very easily. Thus, this pod is both suited for carp fishing at lakes as well as at currents. The arms of the buzzer bars can be loosened and be re-attached at an angle of 90 degrees. Thus, a better pack size is attained and no parts can get lost. The delivery scope comprises 2 buzzer bars and one transportation bag.

Material transportation bag:
100% polyester.

Transportation bag: 82x30cm
Buzzer bars: 51.5x21.5cm (distance of bite indicators: 25cm)
Telescopic legs: 47-77cm

Material: stainless steel
Weight: approx. 3kg

The arms of the buzzer bars can be loosened and be re-attached at an angle of 90 degrees. Thus, a better pack size is attained and no parts can get lost.

Carp hooks and supplies

Teflon® coated
T4

Pro Carp T4

The Pro Carp T4 is coated with dull black Teflon and therefore hardly reflects any light. Thus it is the perfect hook for shallow water. Thanks to its sharpness and the low weight, this hook is very versatile applicable. The inside curved hook tip is ultra-sharp and hooks a least pressure.

Art-No.	cont.
11-05205	25 pc

Chod Rig

Chod Rig Complete

Chod rigs are gaining more popularity within modern carp anglers. The chod leaders do not only look professional with a pop-up montage – they also have many advantages. The lead is fixed at the end of the main line, which prevents tanglings during the cast. The short fluorocarbon leader rests perfectly above the ground and makes it difficult for the carp to spit out the hook. The chod rig is a pure pop-up montage.

Art-No.	hook	cont.

11-02311-4	4	1
11-02311-6	6	1
11-02311-8	8	1

Hair Rigs

Classic Boilie Rig

Extremely wide field of application – nearly every carp bait can be mounted to the Classic Rig. Due to the mounted Rolling Swivel, this rig can be fished with an inline lead as well as with a Safety Clip. The sinking leader material is nearly invisible for carps under water.

Art-No.	hook	cont.	
11-02300-1	1	2	
11-02300-2	2	2	
11-02300-4	4	2	
11-02300-6	6	2	
11-02300-8	8	2	

Line-Aligner Rig

The line-aligner rig provides an unique hook feature. Due to the downward shaped shrink tube it is difficult for the carp to spit out the absorbed bait and hook. Use boilies, pop-ups, pellets and particles with this rig.

Art-No.	hook	cont.

11-02301-4	4	2	
11-02301-6	6	2	
11-02301-8	8	2	

High Abrasion Rig

If you are confronted with many mussels, plants or branches in the water, this rig is exactly what you need. Due to the high abrasion resistance you retain the complete breaking strength even in difficult situations. Also perfectly suitable for fishing in currents.

Art-No.	hook	cont.	
11-02302-1	1	2	
11-02302-2	2	2	
11-02302-4	4	2	
11-02302-6	6	2	

Classic Rig

A classical rig, combined with a modern absorption at the main line. More and more popular with quick-change swivel. Changing the rig because of an blunt hook or another bait is possible as fast as never before. The leader and the hook are fitting with nearly all kinds of waters and baits.

Art-No.	hook	cont.	
11-02303-1	1	2	
11-02303-2	2	2	
11-02303-4	4	2	
11-02303-6	6	2	
11-02303-8	8	2	

Combi Rig with ring

The Combi Rig combines stiffness for the cast and natural behavior of the bait. The fluoro-carbon material prevents the rig from rolling over and is nearly invisible under water. The used soft leader material ensures an easy sucking of the bait. With to the installation of a Pro Carp Tungsten Putty on the leader you get an excellent pop-up rig.

Pop-Up Boilie Rig

This rig is perfectly suitable if a swimming boilie is necessary. The long leg of the used T2 hook guarantees a natural movement of the bait under water and can be soaked in by the carp easily. Due to the additional Pro Carp Tungsten Putty you can adjust the pop-up's height above the ground.

KD Rig

The KD-Rig is a very popular and commonly used leader. The lead shot between the hook and the Pop-Up not only ensures that the bait is floating above the ground, it also warrants a secure hooking of the fish. Due to the used camouflage leader, the rig can be used with nearly every kind of ground.

Classic Boilie Rig ST

Completely protected knots and an extremely good hooking rate are ensured by the used shrink tubes. The leader and the hook are suitable for all water types. The swivel size matches all common safety clips and inline leads.

11-02320-6	6	2	
11-02320-8	8	2	

Classic Rig ST

Often a simple rig is the key to success. Suitable for all kinds of bait like boilies or particles but also perfect for the pellet rig. Due to the altering colors of the leader, the rig is hard to distinguish from the ground. The swivel size matches all common safety clips and inline leads.

Art.-No.	hook	cont.	
11-02321-2	2	2	
11-02321-4	4	2	
11-02321-6	6	2	
11-02321-8	8	2	

Cover Rig ST

As the name already reveals, this rig is mostly used at uneven grounds. The leader is extremely abrasion resistant and therefore also very well suited for the application at mussel banks. The strongly inwards bent hook ensures a safe hooking. The swivel size matches all common safety clips and inline leads.

Art.-No.	hook	cont.	
11-02322-2	2	2	
11-02322-4	4	2	
11-02322-6	6	2	
11-02322-8	8	2	

Coated Rig ST

Coated rigs have been proven to represent the ultimate choice for pop-up rigs. Just mount a small amount of Tungsten at the spot between hard and soft material and floating boilies are presented right above the ground. Like this the hook bait is somewhat highlighted from the ground bait and gets sucked in instantly from curious carps. Due to the extremely supple tip, also cautious fishes don't feel any resistance at sucking of the bait. The swivel size matches all common safety clips and inline leads.

SmartRig Range

The new Pro Carp SmartRig range is a well-aligned system with coordinated colors and sizes for an easy assembling of diverse carp rigs. Also the ready SmartRig rigs are made of the same components, which enable the angler to change single parts as desired. The SmartRig range is available in the colors „sand“ and „mud“. Thus, any number of rigs can be assembled, which mostly perfectly adopt to the bottom.

SmartRig Set, ready to use

Assembling your own rig for the particular fishing situation has never been easier. These SmartRig complete sets comprise everything for rig construction, except leadcore material and anti-tangle tubes. Color-coordinated and of premium quality. With few exceptions: 5 complete sets per package.

Consisting of:
5x fixed-S lead clips
5x tail rubber
5x anti-tangle sleeves

The quick-change swivel and the front eyelet are made of one part and are securely molded within the lead clip. Thus, the swivel can't get pulled out of the lead clip.

Fixed-S Lead Clip

NEW

5 complete fixed-S safety lead clip sets for the assembly of lead-core safety rigs and anti-tangle tube safety rigs. Easiest mounting, everything matched. The quick-change swivel and the front eyelet are made of one part and are securely molded within the lead clip. Thus, the swivel can't get pulled out the lead clip.

Color: sand

Art-No. 11-00201

Color: mud

Art-No. 11-00211

Simply add leadcore, ready-made leadcore leaders or anti-tangle tube (PVC or silicone) and the ready-to-fish lead clip rig is finished.

Consisting of:
5x fixed-D lead clips
5x tail rubber

The rolling swivel and the front eyelet are made of one part and are securely molded within the lead clip. Thus, the swivel can't get pulled out of the lead clip.

Fixed-D (Distance) Lead Clip

NEW

5 complete fixed-D safety lead clip sets for the assembly of leadcore safety rigs and anti-tangle tube safety rigs. Easiest mounting, everything matched. The rolling swivel and the front eyelet are made of one part and are securely molded within the lead clip. Thus, the swivel can't get pulled out of the lead clip.

Color: sand

Art-No. 11-00202

Color: mud

Art-No. 11-00212

Simply add leadcore, ready-made leadcore leaders or anti-tangle tube (PVC or silicone) and the ready-to-fish super longcast rig is finished. Perfect for direct mounting of stiff rig leaders on the flexible ring.

Consisting of:
5x safety lead clips
5x tail rubber
5x anti-tangle sleeves
5x quick-snap swivel

Safety Lead Clip

NEW

5 complete safety lead clip sets for the assembly of leadcore safety rigs and anti-tangle tube safety rigs. Easiest mounting, everything matched. With quick-change swivel for the quick exchange of leaders.

Color: sand

Art-No. 11-00203

Color: mud

Art-No. 11-00213

Simply add leadcore, ready-made leadcore leaders or anti-tangle tube (PVC or silicone) and the ready-to-fish lead clip rig is finished.

Consisting of:
5x micro lead clips
5x tail rubber
5x rolling swivels with ring

Micro Lead Clip

NEW

5 complete micro lead clip sets for the assembly of leadcore safety rigs and anti-tangle tube safety rigs. Easiest mounting, everything matched. Thanks to the rolling swivel with ring the micro lead clip is perfectly suited for stiff rig leaders, which are attached to the flexible ring. Perfect for delicate rigs in waters with many underwater barriers.

Color: sand

Art-No. 11-00204

Color: mud

Art-No. 11-00214

Simply add leadcore or ready-made leadcore leaders or anti-tangle tube (PVC or silicone) and the ready-to-fish micro lead clip rig is finished.

Consisting of:
5x heavy duty lead clips
5x tail rubber
5x rolling swivels with ring

Heavy Duty Lead Clip

NEW

5 complete heavy duty lead clip sets for the assembly of leadcore safety rigs and anti-tangle tube safety rigs. Easiest mounting, everything matched. Thanks to the rolling swivel with ring the micro lead clip is perfectly suited for stiff rig leaders, which are attached to the flexible ring. Perfect for stronger rigs.

Color: sand

Art-No. 11-00205

Color: mud

Art-No. 11-00215

Simply add leadcore, ready-made leadcore leaders or anti-tangle tube (PVC or silicone) and the ready-to-fish lead clip rig is finished.

Consisting of:
5x safety sleeve clips
5x lock-in snaps
5x rolling swivels with ring

Safety Sleeve Clip

NEW

5 complete running safety clip sets for the assembly of perfect running rigs. Easiest mounting, everything matched. Thanks to the rolling swivel with ring the micro lead clip is perfectly suited for stiff rig leaders, which are directly attached to the flexible ring.

Color: sand

Art-No. 11-00206

Color: mud

Art-No. 11-00216

Simply add leadcore, ready-made leadcore leaders and the rig is finished.

PRO CARP Leader material

Striped Skinline

Striped Line is a fast sinking leader material with a stiff and smooth coating. Due to its striped camouflage surface it's nearly invisible under water. This leader line is standing out due to its extremely breaking strength but at the same time, a very slim diameter.

Summer Camou

Striped Line Summer Camou features a sandy color, which makes it hard to distinguish from bright grounds like gravel or sand. Perfect for shallow types of water.

Autumn Camou

When fishes are located somewhat deeper in autumn, it's time for an Autumn Camou leader. Especially in large waters in autumn there are still weedy areas at 6m depth, where the carps now search for nourishment. The slight greenish leader material is hardly visible at these areas.

summer camou

Art.-No.	length m	strength	
11-08025	10.0 m	25lbs	
11-08035	10.0 m	35lbs	

autumn camou

Art.-No.	length m	strength	
11-08125	10.0 m	25lbs	
11-08135	10.0 m	35lbs	

Sinker Leader Material

Pro Carp Sinker is an extremely supple fast sinking braided leader material. A fast sinking leader with a soft texture combines two advantages: On the one hand it adapts to the bottom structure ideally, on the other hand the carp doesn't feel any resistance when feeding the bait.

olive green

Art.-No.	length m	strength	
11-06425	20m	25.0lb	

Lead Core Super Heavy Camou

Extra-heavy leadcore. Also sticks to the bottom in strong currents. Perfect for shy fishes.

Color: khaki-beige

Art.-No.	length m	strength	
11-05745	9.0 m	45lbs	

Leadcore Camouflage

Thanks to the camouflage coloring this braided leadcore adopts to every bottom color and is perfectly inconspicuous.

Color: green-black

Art.-No.	length m	strength	
11-05730	10.0 m	30lbs	

Weed Dummy

To disguise this leadcore, we attached some weed/grass to it. This leads to a very natural look under water and even if it is slightly moved by the current, it is still very hard to identify as leader. Equipped with two loops for mounting all kinds of swivels.

PVA

PVA makes it possible!

PVA is the short term for polyvinylalcohol, a water soluble material, which is available as tape, line, net or bag. Regardless if especially tempting bait should be presented next to the hook bait, or the

hair should be fixed at the hook shank – PVA makes it possible. And in the Pro Carp range you will find a large variety of PVA products.

PVA Fast & Slow Melt Hex Mesh

The PVA Hex Mesh is a close-meshed PVA net, which is stretched with a plastic pipe to facilitate an easy and quick filling. The provided „Plunger“ simplifies filling. Available with two different pipe diameters: 37mm and 23mm. The package is marked with a color code to facilitate the detection of fitting Pro Carp „Reloader“ spools (5m or 20m).

The PVA Mesh 37mm (pipe diameter) is ideally suitable for greater amounts of stick mix, basic food, particles or bigball boilies in a line.

37mm

The PVA Mesh 23mm (pipe diameter) is perfectly suitable for boilies with 16mm and 20mm, which should be presented in a line.

23mm

quick solubilizing

quick solubilizing

Ensures a prompt 100% solubilizing even in cold water. Perfectly suitable for particles, pellets and boilies.

PVA Fast Melt Hex Mesh

PVA Reloaders

quick melting

The Pro Carp Hex Mesh Reloaders is made for the Pro Carp Fast Melt Hex Mesh.

5m spool

Art.-No.	ø mm	length	
11-05561	37mm	7 m	

PVA Tape & Strings

Especially developed for threading boilies or sealing PVA bags.

PVA Tape

This Pro Carp PVA Tape is an extra strong PVA tape to enable long, powerful casts. Thanks to the embossed surface structure it doesn't stick together. You can pull the tape until it reaches the required width - like this, no memory effect occurs and the tape can enfold its whole power without additional stretching during the cast. Perfectly suitable for closing up PVA bags, making stringers with boilies, pellets or particles. The Pro Carp PVA Tape ensures a quick and steady solubilizing, even in cold water.

Tape, width 10mm

Art-No.	size	cont.	
11-05530	10mm	1 pc	

Tape, width 5mm

Art-No.	size	cont.	
11-05531	5mm	1 pc	

PVA String

Pro Carp PVA String can be used to bead boilies, pellets or particles or to close up Pro Carp PVA bags securely. The Pro Carp string is melting very quickly even in cold water. Like this it is perfectly suitable for fishing in winter.

Art-No.	length	
11-05540	25m	

PVA String 3-braid

Pro Carp PVA String Braid can be used to thread boilies, pellets or particles, to attach them to the rig and to close up PVA bags securely. The triple braided string is extremely powerful, resistant and sustains also very powerful casts.

Art-No.	length	
11-05541	25m	

PVA Bags & Funnel

Filling PVA bags was never easier. The PVA funnel doesn't only help you filling the bags, it also replaces the inconvenient sealing with PVA tape. Content: 10 bags + funnel

1 Prepare

Pull the funnel together and secure it with the attached plexi-ring.

2 Filling

Afterwards slide the PVA-bag over the funnel and fill it with bait. If you place your rig in the bag, pay attention that the lead is located at the bottom of the bag. Thus the center of gravity is improved and the bag can be cast very long.

3

Now fix the funnel and twist the filled bag.

4 Moist

Afterwards moist the upper edge and push the bag into the funnel, to place the damped edge at the bag. The loaded PVA bag is ready. Can also be loaded with complete rigs.

Art-No.	size	cont.	
11-05515	75x100	10 pc	
11-05516	75x175	10 pc	

PVA Bags

Bags

The Pro Carp PVA bags haven't just been developed for stick mix, pellets, particles etc. - the bags are very tearproof so you can also place liquids and other oil-based liquid additives over great distances. The bags only solubilize with water-based liquids and flavors. If you fill in stick mix or hard baits (boilies or pellets) it is sufficient to screw in the nozzle to close the bag and to stick in the hook. If you use liquids it is recommended to close the bag with a Pro Carp PVA string and to install the hook afterwards.

PVA bags 70x100

PVA bags with a length of 100mm, which are perfectly suitable to prepare small amounts of bait and cast them accurately at the feeding spot over great distances.

Art-No.	size	cont.	
11-05501	7x10cm	10 pc	

PVA bags 70x200

The Pro Carp PVA bags with a length of 200mm have been developed to be able to present greater amounts of bait right next to the hook bait.

Art-No.	size	cont.	
11-05502	7x20cm	10 pc	

Cone Bags

These PVA bags have an incorporated string at their surface - just pull the string after filling - no inconvenient, time-consuming closing up is necessary. Especially developed for placing pellets, basic feed, stick mix, particles, maggots or hackled boilies right next to the hook bait even over great distances.

PVA Cone Bags 80x160

The Pro Carp bags with a volume of 80x160mm are made for feeding smaller amounts of bait and greater casting distances.

Art-No.	size	cont.	
11-05510	8x16cm	10 pc	

PVA Cone Bags 100x180

The big Pro Carp bags with a volume of 100x180mm are especially designed for feeding greater amounts of baits.

Art-No.	size	cont.	
11-05511	10x18cm	10 pc	

Roll Out Bags

Pro Carp roll out bags are perfectly fitting for presenting stick mix, boilies, particles and oil-based liquids next to the hook bait.

Simply open the PVA reel and pull off one bag after the other. If you use non-liquid feeding substances it is sufficient to screw in the nozzle to close the bag and to stick in the hook. If you use liquids it is recommended to close the bag with a Pro Carp PVA string and to install the hook afterwards.

PVA Rollout Bags 80x100

Art-No.	size	cont.	
11-05520	8x10cm	23 pc

Baitholder & Boilie Stops

Boilie V-Stopper

Classical, V-shaped standard boilie stops, which can be rigged quickly and easily. They are drawn into the boilie and fix the hook bait. Very good applicable for sensitive fishing up to medium distances. Content: 60 pcs SB-packed

Art-No.	col.	
11-04216	black	
11-04217	transparent	
11-04218	red	
11-04219	yellow	

Boilie Stopper „Super Safe“

Thanks to the special shape these soft „Super Safe“ boilie stops cannot be drawn into the bait and therefore are the proper choice for soft baits and energetic casts. Content: 100 pcs SB-packed

Art-No.	col.	
11-04016	black	
11-04017	transparent	

V-Stopper Set

Perfect when the hook bait sizes often changes, because this package features three different sized of V-stoppers. Easy to rig, the V-stoppers are drawn into the boilie and fix the hook bait securely to withstand also energetic casts. Content. 63 pcs SB-packed

Art-No.	col.	cont.	
11-04501	brown	63 pc	
11-04502	green	63 pc	
11-04503	yellow	63 pc	

Pellet Holder

The Pro Carp pellet holders have been designed for the direct mounting of pellets to the hook. Even the revolving pellet is firmly fixed to the hair, since the plates of the stopper prevent sliding through. Matches with all common pellets and doesn't contrast negatively under water. Available in 2 sizes.

Art-No.	size	cont.	
11-05275	L	50 pc	
11-05276	S	134 pc	

Boilie Holder

Boilie attachment easy to insert to the boilie and fix with the D-rig adapter at the hook.

Art-No.	cont.	
11-04352	10 pc	

Pro Boilie Tools

Developed by our Pro Carp team - ergonomically shaped by our designer (a passionate carp angler too). The soft-touch handle can be used perfectly and sensitively even with wet fingers. Enables every kind of usage.

Expert advise
Christian Meiler recommends

In my opinion these carp tools are optimal regarding their handling and operation. Working with them is fun. The boilie or pop-up can be spudded with the front part of the handle, thus the boilie stopper can be completely drawn into and therefore hidden in the bait. A further highlight is the semicircle at the end of the handle. When I construct rigs and want to tighten the knot, I fix the hook at the eyelet and pull from the other side of the leader. Like this the boilie tool becomes a rig-pulla and every knot is easy to tighten.

Pirks

Head Down Pilk

Since the center of gravity is placed in its head, the Head Down Pilk gains depth quickly. Especially successful at windy conditions, medium to strong current and in deep water areas. Equipped with extra strong Permasteel treble with wide radius.

Body Pilk

Very catchy pilk, especially at low current and little wind. Very vivid action at dwindling down. Equipped with extra strong Permasteel treble with wide radius.

Sea Lures

PERMA STEEL

Giant Shad XL

Extra big and heavy soft plastic shads are the most successful lures, when fishing for halibuts and big cods – the Giant Shad XL has been especially made for this kind of fishing – the two eyelets at the head can be chosen depending on current and drifting speed. The Giant Shad XL shows a vivid action even at little drift and due to its relatively solid rubber mixture, this lure also endures multiple attacks. The extra strong and sharp Permasteel single hook sustains even rough strains during the fight with a huge fish. The eyelet at the belly enables an easy fixation of an additional treble.

Art.-No.	length	wt.
55-52...23	23.0 cm	325 g

PERMA STEEL

Giant Curly Shad

The Giant Curly Tail has especially been developed for fishing for halibut and big cods. The Curly Tail is oscillating even at little drift and produces strong turbulences under water – perfect for fishing for halibuts.

Equipped with strong Permasteel single hook and an eyelet at the belly for mounting an additional treble.

Art.-No.	length	wt.
55-53...23	26.0 cm	320 g

Seacor Elite Shad

Also in Norway fishing with soft plastic lures has become the most successful method for catching halibut, cod and coalfish. The Seacor Elite Shad has especially been constructed for this kind of fishing - the used rubber mixture sustains even plural bites. The Elite Shad has a slim shape to produce less flow resistance. Strong flanking moves offer an optimal appeal for halibut and coalfish.

Available in two different sizes: 18cm and 22cm.

Art-No.	length	cont.
55-6018...	18.0 cm	2 pc
55-6022...	22.0 cm	1 pc

The color „chartreuse“ is UV-luminous and can also be seen by predators in great depths.

Seacor Flunder

A natural imitation of a small flatfish. Due to the special construction of the jighead, this lure can perfectly be dragged over the ground tangle-free. It features a very natural action and therefore is ideally suited for spring, when fish are standing in flat waters. A real big cod-catcher!

Art-No.	length	wt.
55-54116	16.0 cm	115 g

Fishing lead

Sea Lead nightglow

Developed for ground and system fishing.
Can be cast very long.
Coated with durable luminescent nightglow varnish.

Art.-No.	wt.
56-28920	200.0 g
56-28930	300.0 g
56-28950	500.0 g
56-28970	700.0 g

Sea Jigheads

Arrow Jighead

This special head shape is ideally suited for heavy fishing in Norway – due to its flat profile, this head shape is perfectly made for strong drifts, because the current really pushes the head down into deep water and prevents buoyancy. This head shape is also perfectly suited for trolling for halibut, because the lure has only little uplift and shows a vivid action. Depending on the size, it's perfect for depths from 10m to 50m.

Art.-No.	wt.	hook	cont.

55-59200	200g	10/0	1 pc

Trolling Paravan

Ideal for trolling with plugs (do not use too deep sinking plugs), blinker and trolling systems with mounted, dead baits. The ideal trolling velocity is ca. 2 miles per hour or 3.2km/h.

Fix the main line to the hole H1-H6 and the leader with the bait (length between 1.20m and 2.50m) to one hole of V1-V5. Depending on the chosen hole the depth changes as visible in the chart.

Art.-No.

Hooks to Nylon

10 ready leaders per pack

All CGS hooks have an extreme sharp, durable tip. Specially developed barbed hooks support the fast hooking and guarantee a safe hold. All CGS hooks are made from „Hi-Carbon Steel“. A newly developed hardening process makes it even more solid and increases the breaking- resistance. That also is responsible for the durable sharpness of the tip even after many caught fish. Hand knotted and each knot is tested.

NEW

CGS Treble 9050BN

The CGS treble 9050BN is the follow-up model of the legendary 8000BN. The sharpness has been further optimized thanks to an even better carbon steel and also the bending strength has been improved again. What has remained is the extremely thin wire and the roundly bent shape. A great treble at an affordable price. Now with PE-Displaybox. Color: black nickel

Titanium

Titanium leaders „Single Strand“

When a normal wire leader does not satisfy your demands, lacks the necessary flexibility or gets kinks too fast, when it features less linear strength than desired or simply is not slim enough, you should try the „Single Strand“ titanium predator leaders. We promise a wonderful fishing experience and a safe fight with the fish.

High linear strength compared to its diameter
Optimal stiffness – perfect for fishing with jerkbaits or trolling
Slim diameter

Corlock snap

Our titanium, 7x7 and 1x19 leaders are all together equipped with the new Corlock snaps.

1. Symmetric design for a perfect balance
2. The extra-wide curve cares for an optimal lure action. Fitting for all lures.
3. Super strong and reliable lock. Easy to operate.
4. Narrow curve to the swivel, leader loop knot or main line to keep the knot in a centered position.

Titanium Assist Hook

Using assist-hooks at fishing with softplastic lures considerably increases the hooking rate. Especially when fish do attack the lure very consciously, this accessory is indispensable. The 5 lengths cover all lure sizes from 8-22cm. Developed for shads and dead bait fishes.
Content: 2 pieces

PRO CARP

Pro Carp Landing Nets

**PRO CARP**

Carp Force CS Carp Landing Net

The Carp Force CS carp net has been designed for fishing both from the boat and the shore.

The net handle, which is made of High Power carbon, consists of 2 parts (98cm + 84cm), which enables shortening for the use from the boat. The end cap fits to both parts.

The handle is coated with a non-slipping shrink tube, which provides optimal grip also with wet hands.

The net head is made of robust and wear-resistant plastic and is a real eyecatcher thanks to the engraved Pro Carp logo.

Large meshes allow easy netting and cause only small resistance in the water. Net depth 90cm. All parts are delivered in a separate bag to prevent unpleasant odors.

Net: 100% polyester

Art.-No.	size	net depth	handle l.
61-09401	100x100 cm	90 cm	180 cm

The short net handle is ideal for netting carps from the boat, while both handle parts together make this carp net perfectly applicable for netting carps from the bank.

**PRO CARP**

Carp Net „De Luxe“ XL Modell 9307

Super large carp landing net with metal head. Very stable. With composite bar and arms.

Net: 100% polyester

Art.-No.	size	net depth	handle l.

Feeder Tripod

Aluminium Feeder Tripod

Three-piece telescopic tripod made of aluminium. Thanks to the exact thick rubber coat, the rods are optimally protected from damage. Height adjustable from 50cm-110cm. Ideal for feeder fishing.

Art.-No.

63-01025

Tri Pods

Surf Cast Rod Rest

This tripod for 2 rods guarantees the highest stability even in rough conditions. Easy to transport as it is made from aluminium. The telescopic legs are adjustable up to 1.80m and are fixed easily and slip proof with quick snaps. In the point of this tripod a hook is attached to fix a sand bag for stabilization, if needed.

Art.-No.

63-01777

Bait bucket

Big-B Angler Bucket

Big-B angler bags are ingenious.

The used EVA synthetic material is light and easily foldable – thus the large bags can be easily stored in the car or on journeys to save space. When it is folded out, a complete robust container with sufficient stiffness is created which can be used in many ways. Of course the Big-B bags are totally water-proof and can be used as water buckets, too.

Large EVA made angler bucket.
Essential for every angler.

Tackle Boxes

Especially designed for anglers who want to keep their lures neatly arranged, handy and - above all - secure. The K-Don box system is perfectly suiting these demands.

Tackle Box Model 1010

Portable, big tackle box with K-DON design. Lid with 6 different sections for smaller lures. Both parts of the main compartment can be opened separately. The upper part of the box can be closed via a transparent, pivotable box and contains 4 sections. Perfect for medium sized soft plastic lures. The pivotable box in the tackle boxes' inside is equipped with 7 sections. The other part of the tackle box contains 2 big compartments for accessories, small additional boxes or big lures. One compartment can be divided up in 4 sections.

Art-No.	size	
66-10010	47x28x22 cm	

Tackle Box Model 1007

Big tackle box with K-DDON design. An externally accessible accessory compartment with 6 sections is integrated into the lid. To reach the spoons and plugs which are hung up inside at a further compartment, it's not necessary to open the whole tackle box - just open this single compartment from the outside. The upper part is divided in two sections - one section hosts 6 variable suspension sides for plugs or spoons (it's the externally accessible one), the other section is very big and roomy. The tackle boxes' main compartment contains 3 separated boxes to insert. 2 medium sized boxes with 6 sections, whereof 4 ones are variable with 14 available partitions (model 1008) and 1 big one with 9 sections for accessories or big lures like plugs and jerkbaits (model 1009). Single boxes can also be ordered separately (Art.Nr. 66-10008, 66-10009).

Art-No.	size	
66-10007	59x29x37 cm	

Tackle Box Model 1005

Compact tackle box with K-DON design. There is one big main compartment for many accessories in the upper part. The lower part contains 4 transparent boxes (each with up to 13 variable sections), which can be inserted from the front. Single boxes can also be ordered separately (Art.Nr. 66-10006).

Art-No.	size	
66-10005	28x18x27 cm	

Tackle Box Model 1017

Double, stuck together tackle box with K-DON design, which can be separated and used as two single tackle boxes. Each with one carrying handle. Altogether 10 adjustable compartments, which can be divided into up to 44 ones. The perfect big lure box.

Art.-No.	size	
66-10017	38x28x11 cm	

Tackle Box Model 1006

Small transparent lure box with 3 integrated compartments with up to 13 variable sections. Perfect for stowing lures. Fitting with tackle box Art.-Nr. 66-10005.

Art.-No.	size	
66-10006	23x12x3.5 cm	

Tackle Box Model 1008

Medium sized transparent lure box with K-DON design. 6 integrated compartments, whereof 4 ones are variable with 14 available partitions. Perfect for stowing lures. Fitting with tackle box Art.-Nr. 66-10007.

Art.-No.	size	
66-10008	40x22x3.7 cm	

Tackle Box Model 1009

Big transparent lure box with K-DON design. The 9 integrated compartments are perfect for stowing small and big plastic lures, as plugs or jerkbaits. Fitting with tackle box Art.-Nr. 66-10007.

Art.-No.	size	
66-10009	40x22x8 cm	

Tackle Box Model 1011

Portable, bits-and-pieces box. Constructed for storage of hooks, leads, swivels etc. Perfect for the accessories of modern predator fishing as drop shot or finesse fishing.

Art.-No.	size

Soft plastic lure bag Series 500

The compact, functional soft plastic lure bags with „Full Shock Protection“ represent the era of modern predator fishing and appear classical without being conservative. The orange ornamental elements give a vivid touch to the bags. These bags, which are delivered with the CORMORAN lure boxes, combine the claim of functionality with the desire for timeless design.

„Full Shock Protection“
The shock absorbing fleece protects the equipment from getting damaged in case of hits and shocks. Embedded between polyester shell and nylon lining.

Detail explanations

Polyester 600D

Tear-proof and abrasion-resistant material with water-proof PVC coating.

Full Shock Protection

The shock absorbing fleece protects tackle boxes and accessories against damage due to impacts. Embedded between the outer polyester and the lining.

Zippers

Reliable plastic spiral zipper of 7mm and CORMORAN pendants.

PVC Bottom

Ensures great durability, can be cleaned easily and additionally stabilizes the bag's bottom.

Overlapping lid

Protects the main compartment from soaking water via the zipper as far as possible. For a fast opening and closing of the zipper simply turn the overlapping edging up and the complete zipper is uncovered.

Pliers holder

Positioned at the bag's side for a quick access. Universal size for nearly all common pliers. Closable via hook and loop fastener.

Shoulder strap

Within this series, all bags (except the rucksack) have a removable shoulder strap with padded, adjustable shoulder pad.

Design

Classical, conservative with ageless green. The orange ornamental elements give a vivid touch to the bags.

Lure Bag Model 5001

You can identify successful anglers by the time they need to get their lure and stuff ready to hand. Thanks to this handy, compact frontloader soft plastic lure bag with "Full Shock Protection" you will also be ready to fish in short time. 6 lure boxes and a superimposed pocket offer enough space. Delivered with 4 lure boxes (Cormoran model 8047 / 35.5x23x4.5cm) at the main department and 2 lure and accessories boxes (Cormoran model 8007 / 20x14.5x4cm) at both side pockets. The superimposed case for glasses, which is readily accessible and protects your glasses perfectly, is an additional handy gimmick. The pliers holders on both sides always keep this important tool ready to hand. The PVC bottom ensures a great durability and can be cleaned easily. Equipped with carrying handle and an adjustable, padded shoulder strap.

Content: 4 lure boxes Cormoran model 8047, 2 lure and accessories boxes Cormoran model 8007

Bag size: B:48 x T:30 x H:21cm including superimposed pockets
Material: 100% polyester (PVC coated)

Art.-No.	size
65-05001	48x30x21 cm

Lure Bag Model 5002

Convenient to carry by hand or flicked over the shoulder! This handy, very compact soft plastic lure bag with "Full Shock Protection" is ideally suited to carry all necessary lures and stuff without being handicapped by too heavy weights during the "endurance sport" spin fishing. A smart choice for ambitious predator anglers. Delivered with 2 lure boxes (Cormoran model 8048 / 27x18.5x4cm) at the main compartment and a smaller lure and accessories box (Cormoran model 8007 / 20x14.5x4cm) at the superimposed pocket.

The 2 superimposed, very spacious side pockets ensure a fast access to all essential tools or can store additional small tackle boxes. The pliers holders on both sides always keep this important tool ready to hand. The PVC bottom ensures a great durability and can be cleaned easily. Equipped with carrying handle and an adjustable, padded shoulder strap.

Lure Bag Model 5003

No fishing day without the bag model 5003. This compact, very spacious toploader shoulder bag with "Full Shock Protection" represents the era of modern predator fishing. Delivered with 3 lure boxes (Cormoran model 8047 / 35.5x23x4.5cm) at the main compartment. The front pocket is fully padded and can store many accessories. For additional stuff, two big side pockets are available. The pliers holders on both sides always keep this important tool ready to hand. The overlapping lid protects the main compartment from soaking water via the zipper as far as possible.

Equipped with hardcase bottom, carrying handle and adjustable, padded shoulder strap.

Content: 3 lure boxes Cormoran model 8047

Bag size: B:52 x T:31 x H:26cm including superimposed pockets

Lure Bag Model 5004

This bag is perfect, if you have many things to store. The combination of timeless design and a handy construction provides this padded sideloader soft plastic lure bag including "Full Shock Protection" with an unique character. 4 lure boxes (Cormoran model 8048 / 27x18.5x4cm) in the lower compartment, which is accessible via the bags side, and a big upper main compartment for big accessories offer enormous space. Thanks to the space-saving construction, this bag is also perfectly suited for fishing from the boat. A big front pocket for accessories and tools, a superimposed net pocket and 4 voluminous side pockets, for all stuff a professional angler needs, complete the storage possibilities. The pliers holders on both sides always keep this important tool ready to hand. The overlapping lid protects the main compartment from soaking water via the zipper as far as possible. Equipped with solid PVC bottom, carrying handle and broad, thickly padded shoulder strap.

Lure Bag Model 5005

Perfect organization within the rucksack and a pleasant carrying comfort care for more fishing fun. The especially developed rucksack for soft plastic lures offers enough space for all necessary stuff. The adjustable, ventilated and thickly padded carrying straps ensure a comfortable carrying even when the rucksack is fully loaded. The 4 lure boxes (Cormoran model 8047 / 35.5x23x4.5cm) within the lower main compartment are accessible via a transparent net lip at the front, whereas the roomy upper main compartment can be opened nearly completely. Furthermore this rucksack is equipped with a big superimposed pocket with integrated compartments for small accessories and 2 roomy, padded side pockets. The superimposed hard case for glasses, which is easy to access and protects your glasses perfectly, is also a very handy gimmick. The PVC bottom ensures a great durability and can be cleaned easily. Equipped with a broad, very comfortable and thickly padded carrying system.

K-DON

Soft plastic lure bags series K-DON

K-DON

Chest Bag Model 3013

There is nothing better than searching for catchy places at heavily vegetated shores, armed with only lightweight equipment and one single spinning rod. The padded lurebag breast pocket with adjustable shoulder and pelvic straps has been developed for exactly these kinds of situations – it can be put on and cast off very easily due to big quick snaps. Equipped with a main compartment, which contains a lure- and tackle box, and a folding compartment with 12 integrated hanging tubes, which offer space for arranging 12 lures handily and neatly. With practical pliers or scissors holder at the shoulder strap.

Material: 100% polyester (Tarpaulin 600D, PVC coated)

Twinbag Model 3030

Perfect chest- and rucksack bag for the spin angler, who wants to concentrate completely on fishing. The Twinbag also fits if worn with a thick jacket and doesn't disturb in any situation. The shoulder straps and the lap belt are adjustable via quick snaps.

The chest pocket consists of one main compartment with integrated net pockets, a slot pocket, a superimposed net pocket and a tool holder. The rucksack bag consists of one big compartment (32x35x7cm) and a superimposed pocket (32x19x4,5cm), which can store some big lure boxes as well as further equipment easily. 2 tin or bottle holders are located on each side.

Material: 100% polyester (600D, PVC coated)

Art.-No.	size	
65-03030	32x35x12 cm	

Equipping recommendation with CORMORAN tackle boxes

Belt Bag Model 3029

This belt bag with an adjustable strap with quick snap has especially been made for spin anglers and offers enough space for any accessories and lures you need to keep handy. A big main compartment (23x12x8cm) and a superimposed pocket (19x11x4cm) for accessories or lure boxes, and additionally a pocket at the back (23x13x5cm) which offers space for a big lure box (e.g. Cormoran tackle box Model 10025).

A slot pocket with zipper and 2 additional, movable pockets (14x15x5cm), which also can be used as belt bags separately, extend the stowage considerably.

Material: 100% polyester (600D, PVC coated)

Art.-No.	size	
65-03029	23x13x17 cm	

Shoulder Bag Model 3037

Extra big CarryAll shoulder bag with „Full Shock Protection“, which has especially been designed for coarse anglers, who need to carry much equipment to the water.

The large main compartment is completely padded, as well as the superimposed pocket for accessories. With two practical side pockets. Equipped with a solid PVC bottom, carrying handle and adjustable, padded shoulder strap.

Material: 100% Polyester (600D, PVC coated)

Art.-No.	size	
65-03037	53x29x38 cm	

Equipping recommendation with CORMORAN tackle boxes

Shoulder Bag Model 3031

One of the most frequently copied CORMORAN bags. Developed for spin and fly anglers. PVC coated at the inside, for an easy and quick cleaning, and equipped with a strong PVC bottom. Equipped with 3 superimposed and 2 side pockets. Adjustable shoulder strap.

Material: 100% polyester (600D, PVC coated)

Art.-No.	size
65-03031	39x23x18 cm

Equipping recommendation with CORMORAN tackle boxes

Shoulder Bag Model 3032

Supplied with 9 tent pegs and 4 ropes.
Color: olive-green
Material: 100% polyester (210T, water-repellent coated)
Height 1.45m, width front ca. 2.00m, width back to front ca. 1.60m

Art-No.	
68-50040	

Very easy construction:

- Put the tent carefully next to you on the ground and support it with one hand
- Open the stick system in all directions and pull it slightly apart
- Take the rope and pull it upwards
- The tent opens and stands

Super fast deconstruction:

- Put your left hand on the short mullions and the right hand on the one above
- Push both hands apart and the system folds it self

Umbrella Tent

Umbrella with zippable back wall.
Delivered with 8 tent pegs and 3 ropes. With durable metal frame.

Color: dark-green
Material: 100% polyester, water-repellent coated

Range: 220cm

Art-No.	Ø
68-35221	220cm

Thermo Overalls

CORMORAN Thermo Suit Model 9108

Two-piece thermo overall with extra long jacket with kidney protection. The overall is padded with 160g/m² polyester fleece. In combination with its fleece-padded collar and hood this overall is perfect for the cold season. Two large superimposed pockets offer space for supplies. The small chest pocket features a water-repellent zipper – perfect for keys or mobile phones. The high-cut trousers care for retaining the body heat also at cold temperatures. Zippers at the side facilitate the dressing.

Jacket equipment:

- 2 large sealable pockets
- Chest pocket with water repellent zipper
- 1 sealable inner pocket
- Adjustable sleeve width
- Fleece-lined collar
- Detachable hood

Integrated waist drawstring Trousers:

- 2 adjustable side pockets
- 1 sealable inner pocket
- Adjustable legs with zippers
- Overlapping front zipper
- Elastic adjustable braces

Outer material: 100% nylon
 Padding: 100% polyester
 Inner lining: 100% nylon

Astro-Thermo Winter Suit Model 9105

Affordable two-piece overall made of padded 100% waterproof 190T polyamide.

The thermo overall is absolutely waterproof and perfectly thermally insulated. Made of robust nylon fabric, which is PVC coated at the inside. All seams are welded with a sealing strip and thus water-proof, the padding is made of 140g/m² polyester fleece.

The jacket features a padded hood. The trousers are extra high-cut for improved heat insulation.

Outer material: 100% polyamide, PVC coated

Padding: 100% polyamide

Inner lining: 100% polyester

Thermo Boots

High quality, reliability, a good fit and a great look have been the standards for the development of these boots. The result are angler boots, which answer very high expectations. These boots are the first choice for spinning anglers, who move a lot during fishing. But this boots are also a convenient alternative to rubber boots for every other fisherman. They feature a strong inner shaft that stabilizes the foot and prevents snapping of the foot far better than a rubber boot or sneaker.

Astro-Thermo Laced Boots Model 9177

Very comfortable thermo laced shoe with rough cloddy non-slip rubber sole for particular sure-footedness. The sole construction is waterproof till the rubber belt. With strengthened high-cut toe cap for optimum mobility and protection of the toes. The thick foam padding contributes to optimum thermal comfort. Corrosion resistant smooth running shoe-eyes, strong quick-release hooks and the finger lug facilitate lacing these shoes.

Upper material: 20% nylon, 80% velours leather
Inner lining: 100% polyamide (nylex)
Sole: TRP thermoplastic rubber

91-77546	45/46	
91-77647	46/47	

Laced Boots Model 9195

Robust and convenient boots for autumn and winter. The padding easily can be removed and be cleaned and washed separately. The boots are completely waterproof till the first seam – perfect for autumn and winter. The rough profile provides high stability at wet ground.

Upper material: 100% PVC
Padding: 100% polyester

Boots

Natural Rubber Boots with Cotton Lining

High-end, durable rubber boots made of natural rubber with cotton lining. Within these boots, wearing comfort is most important – the “Steel-Shank” treaded sole is double bolstered to guarantee optimal walking comfort even on bumpy grounds. Additionally the strong sole considerably facilitates walking on slippery and marshy ground. The high bootleg has been lined capaciously to offer enough space for strong legs.

Outer material: 100% rubber
Lining material: 100% cotton

Musky Killer

Very successful for large pikes.

Art.-No.	size	wt.
52-89600	5	15.0 g

FLAMBEAU is developing many products in different sectors for over 60 years now. With their innovations and strict quality criteria, they succeeded to create an especially capable product line within the fishing sector.

Zerust®, patented procedure to avoid rust and corrosion of your fishing equipment. Zerust® is already incorporated in the plastic material of some FLAMBEAU tackleboxes and lure boxes and distributes a harmless substance which forms a protection covering on metal surfaces and thus automatically avoids corrosion of hooks, pliers etc. All Zerust® products maintain their efficacy over 5 years and thus offer an enduring protection against corrosion to save money and keep your equipment functioning. All tackleboxes with Zerust® protection are tagged with the Zerust® logo obviously.

Zerust Rust Protection Plate

Patented procedure to avoid corrosion within your equipment boxes. Add the Zerust®-antirust plates to the tacklebox, hookbox, tool box etc. In the radius of 30cm the Zerust®-bar distributes a protection covering, that avoids corrosion of metal pieces and hooks.

Content: 10 plates
